

Test Case 3) PDF enhancement

Version: 20231105_V1.0.1

• "User Property" to set the PDF A1A with fallback font

User property	Type	Value	Default	Result
PdfEmitter.Version • supported values / enum: 1.3, 1.4, 1.5, 1.6, 1.7	String	1.7	1.5	PDF version 1.4
PdfEmitter.Conformance • supported values / enum: PDF.X32002, PDF.A1A, PDF.A1B • PDF.A* overwrite the PDF-version	String	PDF.A1A	PDFXNONE	PDF/A1a
PdfEmitter.IccProfileFile • supported value: full file path of the icc profile file, e.g. /icc_profile/srgb_iccv2.icc	String	unset	ICC profile: sRGB IEC61966-2.1	n/a
PdfEmitter.IccColorType • supported values / enum: CMYK, RGB	String	RGB	Color type: RGB	RGB
PdfEmitter.PDFA.AddDocumentTitle • supported values / enum: true, false (fix the openPDF 1.3.30 issue of PDF/A with "dc:title on the XMP metadata)	String	false	Document title: false	no title
PdfEmitter.PDFA.FallbackFont • supported value: font file name of an installed font e.g. "arial.ttf"	String	Belli.ttf	null	n/a

This text is used with an unembeddable font "@Malgun Gothic" and it will be replaced with the installed PDF/A fallback font "Belli.ttf".
