Target:						
Step	Test Case	Action	Verification			Comment
1	Verify C/C++ EPP Package RC1					
1.1	Download EPP Package	Download, extract and start EPP package	EPP Package starts	Manual	Pass	
1.2	Version of Tracing Features	Go to Help -> About Eclipse -> Installion Details	Verify that all tracing features and plug-ins are present and have the correct version (TMF, LTTng, CTF, GDBTrace, PCAP/PCAPNG)	Manual	Pass	
1.3	TMF presence	Open Tracing perspective	Tracing perspective opens	Manual	Pass	
1.4	LTTng presence	Open LTTng Kernel perspective	LTTng Kernel perspective	Manual	Pass	
1.5	Network Tracepoint Analysis presence	Open GDB Trace perspective	GDB Tracepoint analysis perspective	Manual	Pass	
1.6	2019-03 Update Site	Go to Help -> Install New Software> Update site "2019-03 - http://download.eclipse.org/staging/2019-03/"	Verify that all LTTng Kernel, LTTng UST and GDB	Manual	Pass	
2	Verify C/C++ EPP Package RC2	0.07		ivialidal	1 433	
	City C/CTT LIFF Fackage RCZ	Download, extract and start EPP package. Check the n	n			
2.1	Download EPP Package	https://dev.eclipse.org/mailman/listinfo/epp-dev	EPP Package starts	Manual	Pass	
2.2	Version of Tracing Features	Go to Help -> About Eclipse -> Installation Details	Verify that all tracing features and plug-ins are present and have the correct version (TMF, LTTng, CTF, GDBTrace, PCAP/PCAPNG)	Manual	Pass	
2.3	TMF presence	Open Tracing perspective	Tracing perspective opens	Manual	Pass	
2.4	LTTng presence	Open LTTng Kernel perspective	LTTng Kernel perspective	Manual	Pass	
2.5	GDB Tracepoint Analysis presence	Open GDB Trace perspective	GDB Tracepoint analysis perspective	Manual	Pass	
2.7	PCAP/PCAPNG presence	Open Network perspective	Network perspective opens	Manual	Pass	
2.6	2019-03 Update Site	Go to Help -> Install New Software> Use the testing update site "2019-03 - http://download.eclipse.org/staging/2019-03/"	Verify that all LTTng Kernel, LTTng UST and GDB	Manual	Pass	
3	Verify C/C++ EPP Package RC3	0.9/0.dgmg/2010 00/				
3.1	Download EPP Package	Download, extract and start EPP package	EPP Package starts	Manual	N/A	
3.2	Version of Tracing Features	Go to Help -> About Eclipse -> Installation Details	Verify that all tracing features and plug-ins are present and have the correct version (TMF, LTTng, CTF, GDBTrace)	Manual	N/A	
3.3	TMF presence	Open Tracing perspective	Tracing perspective opens	Manual	N/A	
3.4	LTTng presence	Open LTTng Kernel perspective	LTTng Kernel perspective	Manual	N/A	
3.5	GDB Tracepoint Analysis presence	Open GDB Trace perspective	GDB Tracepoint analysis perspective	Manual	N/A	
3.6	Network Tracepoint Analysis presence	Open Network Trace perspective	Network Tracepoint analysis perspective	Manual	N/A	
3.6	2019-03 Update Site	Go to Help -> Install New Software> Use the testing update site "2019-03 - http://download.eclipse.org/staging/2019-03/"	Verify that all LTTng Kernel, LTTng UST and GDB	Manual	N/A	
4	Verify C/C++ EPP Package RC4					
4.1	Download EPP Package	Download, extract and start EPP package	EPP Package starts	Manual	N/A	
4.2	Version of Tracing Features	Go to Help -> About Eclipse -> Installation Details	Verify that all tracing features and plug-ins are present and have the correct version (TMF, LTTng Control, LTTng Kernel, LTTng UST, CTF, GDBTrace)	Manual	N/A	
4.3	TMF presence	Open Tracing perspective	Tracing perspective opens	Manual	N/A	
4.4	LTTng presence	Open LTTng Kernel perspective	LTTng Kernel perspective	Manual	N/A	
4.5	GDB Tracepoint Analysis presence	Open GDB Trace perspective	GDB Tracepoint analysis perspective	Manual	N/A	
4.6	2019-03 Update Site	Go to Help -> Install New Software> Use the testing update site "2019-03 - http://download.eclipse.org/staging/2019-03/"	Verify that all LTTng Kernel, LTTng UST and GDB	Manual	N/A	

4.3.0-TraceCompassTestCases Integration

5	Verify Update Site					
5.1	2019-03 Update Site	Download Eclipse for Committers and install LTTng Kernel, LTTng UST, GDBTrace and PCAP Network Analysis from main simrel testing Update site "2019-03 - http://download.eclipse.org/staging/2019- 03/"	Verify that installation was successful	Manual	Pass	
5.2	Trace Compass Update Site	Download Eclipse for Committers and install LTTng Kernel, LTTng Control, LTTng UST, GDBTrace and PCAP Network Analysis from the Linux Tools Update site http://download.eclipse. org/tracecompass/photon/milestones	Verify that installation was successful	Manual	Pass	
5.3	Upgrade using 2019-03 Update Site	Download Eclipse for Committers from Photon.0 and install LTTng, LTTng Kernel, GDBTrace and PCAP Network Analysis from main simrel Update site. http://download.eclipse.org/releases/photon Try to update the installation using the testing simrel update site. http://download.eclipse.org/staging/2019-03/	Verify that installation was successful	Manual	Pass	
5.4	Upgrade using Trace Compass Update Site	Download Eclipse for Committers from Photon.0 and install LTTng, LTTng Kernel, LTTng UST, GDBTrace and PCAP Network Analysis from the Trace Compass release Update site. http://download.eclipse.org/tracecompass/releases/4. 3.0/repository Try to update the installation using the Trace Compass update site http://download.eclipse.org/tracecompass/photon/milestones	Verify that installation was successful	Manual	Pass	
		Download Eclipse previous C/C++ EPP package. Try to upgrade using both update sites: (TODO find correct job: https://hudson.eclipse.org/packaging/job/luna.epp-tycho-build/128/artifact/org.eclipse.epp. packages/archive/repository/) "Mars - http://download.eclipse.org/releases/maintenance"				
5.5	Upragde from previous EPP	The information about the update sites to use is usually posted on epp-dev	Verify that installation was successful	Manual	Pass	
6	Verify Update Site	Release outside release train				
6.1	Trace Compass update site	Download Eclipse standard and install LTTng Kernel, L UST, GDBTrace and PCAP Network Analysis from ma Update site: http://download.eclipse.org/tracecompass/	i	Manual	N/A	
6.2	Upgrade using Trace Compass update site	Download Eclipse standard from Photon SR0 and install LTTng, LTTng Kernel, LTTng UST, GDBTrace and PCAP Network Analysis from the Trace Compass update site: http://download.eclipse.org/tracecompass/stable/repository/	Verify that installation was successful	Manual	N/A

		to workspace" and select "Overwrite existing without	traces are overwritten). Make sure trace can be			
3.9	Default overwrite	warning"	opened	SWTBot	Pass	

3.10	Import unrecognized	Open Import wizard (see 3.1-3.2)     Browse to directory \${local}/traces/import     Select trace unrecognized.log     Keep Auto Detection>, Select "Import unrecognized traces", unselect "Overwrite existing without warning" and select "Create Links to workspace" and     Spress Finish	unrecognized.log is imported with trace type unknown. The default text file icon is displayed. The trace, when opened, is displayed in the text editor.	SWTBot	Pass
3.10	import unrecognized	7.4	editor.	SW I DOL	rass
		redo 3.10, however unselect "Import unrecognized traces"			
3.11	Import unrecognized (ignore)		unrecognized.log is not imported	SWTBot	Pass
	Preparation	Delete all traces in project - Right mouse click on Traces folder and select "Clear"	, , , , , , , , , , , , , , , , , , ,	SWTBot	Pass
3.12	Import CTF trace by selection metadata file only	Redo 3.5, However only select metadata file instead of directory trace	Imported trace appear in Traces Folder and the Trace Type "LTTng Kernel" is set. Make sure that trace can be opened	SWTBot	Pass
3.12	-	3	that trace can be opened	3 W I BOL	F 455
	Preparation	Delete all traces in project  1) Open Import wizard (see 3.1-3.2)			
3.13	Recursive import with auto-detection (Rename All)	2) Browse to directory \${local}/traces/import 3) select directory import 4) Keep <a href="Auto Detection">Auto Detection</a> , Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish 6) When dialog appears select "Rename All"	All Traces are imported with respective trace type set. Traces with name clashes are imported with suffix (2). I trace (unrecognized.log) is imported with trace type unknown. Make sure that traces can be opened which have a trace type set. The unknown trace type should open with the text editor.	SWTBot	Pass
	Preparation	Delete all traces in project			
3.14	Recursive import with auto-detection (Overwrite All)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/races/import/ 3) select directory import 4) Keep <auto detection="">, Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish 6) When dialog appears select Overwrite All"</auto>	All Traces are imported with respective trace type set. Traces with name clashes are overwritten. I trace (unrecognized.log) is imported with trace type unknown. Make sure that traces can be opened which have a trace type set. The unknown trace type should open with the text editor.	SWTBot	Pass
	Preparation	Delete all traces in project			
3.15	Recursive import with auto-detection (Skip All)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Keep ~Auto Detection~, Select "Import unrecognized traces", unselect "Overwrite existing without warning" and select "Create Links to workspace" and uncheck "preserve folder structure" 5) press Finish 6) When dialog appears select Skip All"	All Traces are imported with respective trace type set. Traces with name clashes are not imported. 1 trace (unrecognized.log) is imported with trace type unknown. The unknown trace type should open with the text editor.	SWTBot	Pass
	Preparation	Delete all traces in project			
3.16	Recursive import with auto-detection (test rename, overwrite and skip)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/\$ 3) select directory import 4) Keep -Auto Detection>, Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish 6) When dialog appears select "Rename" 7) When dialog appears select "Overwrite" 8) When dialog appears select "Skip"	All Traces are imported with respective trace type set. Traces with name clashes are either renamed, overwritten or skipped as per dialog action. Make sure that traces can be opened which have trace type set. The unknown trace type should open with the text editor.	SWTBot	Pass
	Preparation	Delete all traces in project			
3.17	Recursive import with specific trace type 1 (Skip All)	1) Open Import wizard 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "Generic CTF Trace", Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" and 5) press Finish 6) When dialog appears select Skip All"	After selecting trace type, verify that button "Import unrecognized traces" is disabled.  4 CTF traces are imported with trace type "Generic CTF Trace". Make sure that these traces can be opened	SWTBot	Pass
J.11	Spe . (Skip mi)	o, and og appears select skip i ii	auces can be opened	SHIDOL	1 433

	Preparation	Delete all traces in project				
3.18	Recursive import with specific trace type 2 (Skip All)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "LTTng Kernel Trace", Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish 6) When dialog appears select Skip All"	After selecting trace type, verify that button "Import unrecognized traces" is disabled.  One LTTng Kernel trace is imported with trace type "LTTng Kernel Trace". Make sure that this trace can be opened.	SWTBot	Pass	
3.16	Preparation	Delete all traces in project	nace can be opened.	SW I DOL	F 455	
3.19	Recursive import with specific trace type 3 (Skip All)	1) Open Import wizard 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "LTTng UST Trace", Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish 6) When dialog appears select Skip All"	After selecting trace type, verify that button "Import unrecognized traces" is disabled.  3 LTTng UST traces are imported with trace type "LTTng UST Trace". Make sure that these traces can be opened.	SWTBot	Pass	
	Preparation	Delete all traces in project				
3.20	Recursive import with specific trace type 4 (Skip All)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "Tmf Generic", Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish 6) When dialog appears select Skip All"	All text files in directories are imported as trace and trace type "Tmf Generic" is set. Note that trace type validation only checks for file exists and that file is not a directory. Make sure that these traces can be opened. However traces with wrong trace type won't show any events in the table.	SWTBot	Pass	
	Preparation	Delete all traces in project				
3.21	Import wizard from workbench menu with project selected	1) Select project "Test" in Project Explorer view 2) Open import wizard from menu File > Import > Tracing > Trace Import 3) Browse to directory \${local}/traces/import/ 4) Select trace ExampleCustomTxt.log 5) Keep <auto detection="">, select "Create Links to workspace" and 6) press Finish</auto>	Verify that trace is imported to "Test" project and can be opened.	SWTBot	Pass	
3.22	Import wizard from workbench menu with no project selected	1) Clear selection in Project Explorer view 2) Open import wizard from menu File > Import > Tracing > Trace Import 3) Browse to directory \${local}/traces/import/ 4) Select trace ExampleCustomTxt.log 5) Keep <auto detection="">, select "Create Links to workspace" and 6) press Finish</auto>	Verify that trace is imported to default "Tracing" project and can be opened.	SWTBot	Pass	
	Preparation	Delete all traces in project				
3.23	Drag and Drop from other Tracing	D&D a few LTTng traces from another Tracing project's Traces folder	Selected traces are added to the Traces folder with proper icon. Trace can be opened.	Manual	Pass	
3.23	Drag and Drop from other fracing	project's fraces folder	Selected traces are added to the Traces folder with default icon. Files can be opened with the	ivianuai	1° d55	
3.24	Drag and Drop from non-Tracing	D&D a few files from a non-Tracing project	default ditor.  Selected traces are added to the Traces folder with default icon. For actual traces Trace type is	Manual	Pass	
			detected automatically. Trace can be opened, For non traces the files are added with default icon and they can be opened with the default			
3.25	Drag and Drop from external	D&D a few files from an external file manager	editor.	Manual	Pass	
3.26	Drag and Drop of trace with existing name	D&D a trace with name of an existing trace into traces folder     Confirm the renaming of traces	Verify that trace is added into the traces folder with the trace name of the original trace plus a suffix 2	Manual	Pass	
3.27	Drag and Drop of trace with existing name (2nd time)	Redo test 3.26 with the same trace and same destination folder	Verify that trace is added into the traces folder with the trace name of the original trace plus a suffix 3	Manual	Pass	
3.28	Import destination	Open Import wizard	Verify that "Into Folder" text box cannot be updated	Manual	Pass	
3.20	Preparation	Delete all traces in project			. 230	
	Licharación	Detete att traces in project				

3.29	Recursive import with preserved folder structure	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/} 3) select directory import 4) Select trace type "Tinf Generic", unselect "Overwrite existing without warning", select "Create Links to workspace" and select "Preserve Folder Structure" 5) press Finish	All Traces are imported with respective trace type set. The folder "clashes" is imported with its traces inside. Make sure that traces can be opened which have a trace type set.	SWTBot	Pass	
3.30	Recursive import with preserved folder structure (Skip All)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "Tmf Generic", unselect "Overwrite existing without warning", select "Create Links to workspace" and select "Preserve Folder Structure" 5) press Finish 6) When dialog appears select "Skip All"	The wizard should finish quickly as no trace will be imported. Make sure that traces can be opened which have a trace type set.	SWTBot	Pass	
3.31	Recursive import with preserved folder structure (Rename All)	1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "Tmf Generic", unselect "Overwrite existing without warning", select "Create Links to workspace" and select "Preserve Folder Structure" 5) press Finish 6) When dialog appears select "Rename All"	All Traces are imported with respective trace type set with suffix (2). The folder "clashes" is imported with its traces inside. Make sure that traces can be opened which have a trace type set.		Pass	
3.32	Delete with mixed selection of traces and folders	Delete all traces in project  1) Create two trace folders under the "Traces" folder 2) Import 2 traces under each folder 3) Open all 4 traces 4) Select one trace in the first folder and the second folder in the Project Explorer view 5) Right-click, Delete. Click Yes.	A dialog should ask the user to confirm deletion of the selected elements. Clicking OK should remove all that was selected. The editor of the 3 deleted traces should be closed automatically with one remaining editor opened.	SWTBot	Pass	
3.33	Delete multiple folders	Create 2 trace folders under the "Traces" folder     Import a trace under each folder     Open both traces     Select both folders in the Project Explorer view     Right-click, Delete. Click Yes	A dialog should ask the user to confirm deletion of the selected elements. Clicking OK should remove all that was selected. The editor of both traces should be closed automatically.	SWTBot	Pass	
3.34	Clear single Traces folder	Import 2 traces from different folders preserving folder structure     Open both traces.     Select the Traces folder     Right-click, Clear. Click Yes.	A dialog should ask the user to confirm clearing of the folder. Clicking Yes should remove everything under the selected folder and close the traces	SWTBot	Pass	
3.35	Clear multiple Traces folder  Preparation	Inport 2 traces to different projects     Open both traces.     Select both Traces folders     Right-click, Clear. Click Yes.  Delete all traces in project	A dialog should ask the user to confirm clearing of the folders. Clicking Yes should remove everything under the selected folders and close the traces	SWTBot	Pass	
3.36	Import from zip archive, preserve folder structure	1) Open Import wizard (see 3.1-3.2) 2) Select archive file: traces.zip 3) select directory the root directory 4) Select trace type "Automatic", unselect "Overwrite existing without warning" and select "Preserve Folder Structure" 5) press Finish		SWTBot	Pass	
	Preparation	Delete all traces in project

Trace Package Import Wizard  Create an empty tracing project. Make sure you have (excluding supplementary files) 2) No. tracing folder 3) An export-manifest.xml file listing the trace files and bookmarks  Manual Pass
14 Trace Package Import Wizard  Create an empty tracing project. Make sure you have
Create an empty tracing project. Make sure you have
export.tar.gz available from the Trace Package Export Wizard (13) test case, which should include everything including trace files, supplementary files and export-manifest.xml.
Click on "File", "Import", "Tracing", "Trace  14.2 Open the trace package import wizard  Click on "File", "Import", "Tracing", "Trace  Package Import" and click Next  The first page of the wizard should appear  (Choose content to import)  SWTBot  Pass
Click the Select button. Choose the previously created project field gets filled with the selected project name.  Click the Select button. Choose the previously created project name.  SWTBot  Pass
Finish should be become enabled when the first trace is selected. If all traces are unselected, the Next button is disabled.  SWTBot  Pass
With traces selected, press the Deselect All button.  14.5 Deselect/Select All Then press on the Select All button.  With traces selected, press the Deselect All button.  Finish should become disabled after Deselect All, enabled after Select All.  SWTBot
14.6 Trace element selection Unselect the trace2 element All elements in the trace tree are unselected. SWTBot Pass
14.7 Trace sub-element selection Unselect the kernel_vm > Trace element All elements in the trace tree are unselected. Manual Pass
With nothing selected, click Select All. Then click are selected. When Deselect All is clicked, all the tree elements are selected. When Deselect All is clicked, all the tree elements are deselected  When Select All is clicked, all the tree elements are selected. When Deselect All is clicked, all the tree elements are deselected  SWTBot  Pass
A progress bar should appear at the bottom the the dialog and it should disappear upon completion. The two traces should appear under the project in Project Explorer SWTBot Pass
14.9 Finish the wizard Click Finish the project in Project in Project Explorer SWTBot  Pass  Delete Supplementary files appears in the content menu Manual  Manual  Pass
Bookmarks appear in the list for the imported
14.11 Bookmarks Open the Bookmarks view traces Manual Pass
The corresponding trace opens at the bookmarked event. Bookmarks are displayed in the event table.  The corresponding trace opens at the bookmarks are displayed in the event table.  Manual Pass
Open the wizard again (step 13.2) and select the archive file (step 13.4). Click Finish.  A dialog should prompt the user to overwrite for each trace. Answering Yes to All should overwrite without prompting again.  Manual  Pass
15 Time Offsetting
Open Project Explorer view and Properties view. Create an empty tracing project. Import two different traces to the project. Open the traces and note their start time. Close the traces.
Apply time offset dialog - trace
Select the Traces folder element in the Project Apply time offset dialog - folder Explorer view. Right-click and select Apply Time Offset in seconds is blank.  SwTBot  The Apply time offset dialog opens in Basic mode. The Trace name show both traces and the Offset in seconds is blank.  SwTBot  Pass
Apply time offset dialog - experiment  Apply time offset dialog - experiment  Apply time offset dialog - experiment experiment experiment element in the Project Explorer view.  Right-click and select Apply Time Offset  The Apply time offset dialog opens in Basic mode. The Trace name show both traces and the Offset in seconds is blank.  SWTBot  Pass
Select a trace element in the Project Explorer view. Right-click and select Apply Time Offset In the Offset in seconds column, enter a time with seconds and decimals. Click OK. Open the trace.  SWTBot  Pass

15.6	Apply time offset dialog - cumulative offset	Select the same trace element in the Project Explorer view. Right-click and select Apply Time Offset In the Offset in seconds column, enter a time with seconds and decimals. Click OK. Open the trace.	The timestamps in the trace are all offset by the cumulative sum of the previous and current entered value. The Properties view shows the 'time offset' with the cumulative value.	SWTBot	Pass	
15.7	Clear time offset	Select the trace element in the Project Explorer view. Right-click and select Clear time offset. Click OK to confirm. Open the trace.	The timestamps in the trace are back to their original values. The Properties view shows the 'time offset' as blank.	SWTBot	Pass	
15.8	Apply time offset dialog - Advanced mode	Open one trace and close the other trace. Select both trace elements in the Project Explorer view. Right-click and select Apply Time Offset Choose the Advanced radio button.	The Apply time offset dialog opens and is switched to Advanced mode. The Trace name show both traces and the Offset in seconds is blank. The Reference time for the opened trace is set to its start time.	Manual	Pass	
15.9	Apply time offset dialog - Advanced mode - compute from selection	Double-click the second trace to open it. Select an event in its trace editor. Select the first trace editor. Select an event in its trace editor. Click the button in the dialog row of the second trace. Click OK. Open both traces.	Both traces are open. Selecting an event updates the Reference time for the selected trace, and updates the Target time for all traces. Pressing the button computes the Offset in seconds as the difference between Target time and Reference time for that row. The trace which has a computed offset is closed when the OK button is pressed. After reopening, the two previously selected events now have the same timestamp. The Properties view shows the 'time offset' with the computed value.	Manual	Pass	No button
15.10	Apply time offset dialog - Advanced mode - compute from entered values	Select the first trace element in the Project Explorer view. Right-click and select Apply Time Offset Choose the Advanced radio button. Double-click the trace name to open it. Select the Reference time cell and copy the start time. Select the Target time and paste the value. Edit both values to different times. Click the button in the trace row. Click OK. Open the trace.	The trace is opened. The Reference time is set to the trace start time. The Reference time and Target time can be copied, pasted, and edited. Pressing the button computes the Offset based on the current time values. The trace is closed with the OK button is pressed. After reopening, the timestamps in the trace are offset according to the computed value. The Properties view shows the 'time offset' with the computed value.	Manual	Pass	Cannot edit
15.11	Clear time offset with opened traces	Open both traces. Select both trace elements in the Project Explorer view. Right-click and select Clear time offset. Click OK to confirm. Open the traces.	The opened traces are closed when the OK button is pressed. After reopening, the timestamps in the traces are back to their original values. The Properties view shows the 'time offset' as blank.	Manual	Pass	GTK 3 broke the apply time offset

4.2	table	SEND or RECEIVE)	selected in the 'Sequence Diagram' view	Manual	Pass				
			W 10 d . d						
			Verify that the content of the 'Sequence diagram' changes and the interactions are						
4.3	Selection of new time range	Change time range in 'Histogram View'.	part of the new window range	Manual	Pass				
5	View Actions								

4.3.0-TraceCompassTestCases SequenceDiagram

5.1	Test page navigation	Use buttons and menu items 'Go to next page', 'Go to previous page', 'Go to last page' and 'Go to first page' to navigate through trace. Use also menu item 'Pages' to jump to specific page	Verify that different time ranges are selected when changing page by looking at Histogram View. Histogram View window will show the start of the page. Note that there are 10000 interactions per page. In this traces there are in total 160032 interactions. Verify that last page has 32 interactions between 2 lifelines.	Manual	Pass				
5.2	Test menu item 'Pages'	1) Select menu item 'Pages' 2) In text box type "9" 3) Click on 'OK'	Verify that a dialog box will show. Verify that for this trace it shows 'Total: 17 pages is shown' and the current page is displayed in the text box. After step 3) verify that page where changed to page 9. For this trace page 9 is the page with 3 lifelines.	Manual	Pass				
5.3	Find of interaction	Goto to page 1 → 1) Use button and menu item "Find" 2) select Interactions and deselect lifeline 3) type regular expression 10.*00 4) press find 5) press find 6) press find 7) press find 8) press find 8) press find	After 4) verify that interaction 10000 (player1 → master) is selected. After 5) verify that interaction 10100 (master → player1) is selected. After 6) verify that 10000 (player2 → master) is selected. After 7) verify that interaction 10100 (master → player2). After 8 nothing else will be found	Manual	Pass				
5.4	Find of lifeline	Goto to page 1 → 1) Use button and menu item "Find" 2) select lifeline and deselect interaction 3) type player2 4) press find 5) press find	After 4) verify that lifeline with name player2 is selected (page 9 with 3 lifelines). After 5) player2 is selected on page 10	Manual	Pass	I agree with JC, It reaches the right pages but the selection does not highlight anything when the find box is still opened. It only highlight the lifeline when we close the find dialog.  Bernd: It supposed to highlight the lifeline on the correct page. So, test is successful. JC: The selection highlight the lifeline but it is difficult to see.			
		1) Restart eclipse	Verify that previous used find criteria are			the member but it is difficult to see.			
5.5	Find criteria persistence	open find dialog     Select 'Sequence Diagram' view	still in the list	Manual	Pass				
5.6	Find short-cut	2) press CTRL+f	Verify that find dialog opens	Manual	Pass	Hung: I have changed pres CTRL+F to press CTRL+f			
5.7	Filter of interactions	Goto to page 1 → 1) Use menu item 'Hide Patterns' 2) Press Add 3.1) select Interactions and deselect Lifeline 3.2) type regular expression 10.*03 4) Press 'Create' 5) Press 'Ok'	After 5) verify that Interactions with name 10003 and 10103 are not shown	Manual	Pass				
5.8	Filter of lifelines	Goto to page 9 → 1) Use menu item 'Hide Patterns' 2) Press Add 3.1) select Lifelines and deselect Interactions 3.2) type regular player2 4) Press 'Create' 5) Press 'Ok'	After 5) verify that player2 is not shown	Manual	Pass				
		Apply one filter     Use menu item 'Hide Patterns'     deselect filter	Verify that all lifelines and interactions are						
5.9	Deselect filter	4) click 'Ok' 1) Restart eclipse	shown Verify that previous used hide criteria are	Manual	Pass				
5.10	Filter criteria persistence	2) open hide dialog	still in the list	Manual	Pass				
5.11	Zoom-in	Use button and menu item for zoom-in to activate zooming in     click into sequence diagram view	Verify that 'Sequence Diagram' view zooms in. Note that no selection is possible.	Manual	Pass				
		Click on button and menu item 'Select' to go back to selection mode							
5.12	Selection after zooming	2) select an interaction	Verify that selection is possible.	Manual	Pass				
		Use button and menu item for zoom-out to activate zooming out	Verify that 'Sequence Diagram' view zoom out. Note that no selection is						
5.13	Zoom-out	click into sequence diagram view     Use button and menu item for 'Reset zoom factor' to reset	possible.	Manual	Pass				
5.14	Reset zoom	the zoom level	back to default zoom	Manual	Pass				

4.3.0-TraceCompassTestCases SequenceDiagram

5.15	Configure min/max	1) Select menu item 'Configure Min Max' 2) Change min to 100 and max to 2000 (keep scale and precision) 3) press 'Ok'	After I) verify that a dialog box shows with default values. After 3) verify that time compression bar changes some colors. It will show more deeper red because the max value is lower.	Manual	Pass						
5.16	Configure min/max (default)	After changing min and max 1) select menu 'Configure Min Max' 2) press 'Default' 3) press 'Ok'	After step 2) the default values are shown. After step 3) the time compression bar will change colors. Note that the default values are computed based on all deltas of 2 consecutive interactions.	Manual	Pass						
5.17	Show node end	Goto to page 1 → 1) Resize view so that the arrow of the interaction is not shown 2) select on interaction 3) Use menu item Navigation → Show node end	Verify that end lifeline of the interaction (the arrow) is shown	Manual	Pass						
5.18		Goto to page 1 → 1) Resize view so that the beginning of the interactions are not shown 2) select on interaction 3) Use menu item Navigation → Show node start	Verify that start lifeline of the interaction is shown	Manual	Pass						
5.19	Show node end short-cut	Goto to page 1 →  1) Resize view so that the arrow of the interaction is not shown  2) select on interaction  3) Press SHIFT+ALT+END	Verify that end lifeline of the interaction (the arrow) is shown	Manual	Pass	The shortcut is not working when the mouse is hovering the interaction as seen in the previous version 4.0.0					
5.20	Show node end short-cut	3) Press SHIFT+ALT+END Goto to page 1 → 1) Resize view so that the arrow of the interaction is not shown 2) select on interaction 3) Press SHIFT+ALT+HOME	Verify that start lifeline of the interaction is shown	Manual	Pass	The shortcut is not working when the mouse is hovering the interaction as seen in the previous version 4.0.0					
5.21	Scroll down short cut	Press SHIFT+ALT+ARROW DOWN	Verify that within a page the display scrolls down per view size	Manual	Pass						
5.22	Scroll up short cut	Press SHIFT+ALT+ARROW_UP	Verify that within a page the display scrolls up per view size	Manual	Pass	Key combination on Ubuntu 12.04 is used for something else. This can be disabled using the combiz-settings-manager (http://askubuntu.com/question/171489/how-to-unbind-shift-alt-up-shortkey-in-12-04) After disabling this combination this test case passes On Ubuntu 14.04, 14.10, this is not an issue, by default the keys are not mapped.					
5.23	Overview feature	Goto page 9 → Keep pressing + icon at the lowest right	Verify that it's possible to navigate through a page of the sequence diagram view	Manual	Pass	On Ubuntu, the movement is hectic and the overview box is very narrow.  On Mac OS X 10.8, the button is not visible but there is a visible empty space that is clickable in its place. Clicking on it brings up the overview box which has a reasonable size but movement is still hectic.  Bug 436442					
		corner of the view and drag down, up, left or right  Select 'Sequence Diagram' view and press printer icon in the Eclipse's tool bar (or use CTRL+P). Select one pager page to				The dialog is confusing on Ubuntu. The "from pages" option do not update directly the values you enter	GTK 3 proble	em ?			
5.24	Print	print	Verify that it is possible to print	Manual	Pass	Works on windows (including CTRL+P)	Pass on 16.0	04 and 16.10	could it be cup	s giving you a	hard time?
5.25		1) Create I filter if necessary (see 5.8) 2) Open Error Log view if necessary 3) Open filter dialog box and remove all filters 4) Press 'Ok' 5) Open filter dialog box again	Verify that no exceptions occurred and after 5) no filter are listed	Manual	Pass						
5.27	Time Sync. without interactions (Bug 391716)	Open trace without any sequence diagram information     Open SD view if necessary     Open Error Log view if necessary     Change time range in Histogram view     Change time current selected time in Histogram View	Make sure that no exceptions occurred	Manual	Pass

Target:	Linux 64					
Stop	Test Case	Action	Verification	Type		Comment
Step	rest case	Action	Verification	Туре		Comment
0	Prerequisites					
0.1	Get custom parser definition and logs	Find text and XML parser definitions in Traces.zip/traces/customParsers and logs in /import				
1	View management					
1.1	Open perspective	Open and reset Tracing perspective, and open Time Chart view	Time Chart view opens.	SWTBot	Pass	
1.2	Import custom parser definitions	Create a tracing project, open Manage Custom Parsers dialog and import text and XML custom parser definitions	Custom parsers imported (TmfGeneric, Custom XML Log)	RCPTT	Pass	
1.3	Import custom traces	Create a tracing project and import a text and XML custom trace	Traces imported in Traces folder of project (ExampleCustomTxt.log, ExampleCustomXml.xml) and have their trace type auto-selected.	RCPTT	Pass	
2	Custom parser management	and AME custom trace	type auto-selecteu.	KCF11	rass	
	Custom parser management	Open Manage Custom Parsers dialog in				
2.1	Open Manage Custom Parsers dialog	Traces folder context menu	Dialog opens.	SWTBot	Pass	
2.2	New (text)	Select "Text" radio button, click New button, enter Trace type, change stuff, click Next, click Finish	Custom parser appears in list.	SWTBot	Pass	
2.3	Edit (text)	Select custom parser, click Edit, change stuff, click Next, click Finish	Previously entered data appears, can be edited.	SWTBot	Pass	
2.4	Export (text)	Select custom parser, click Export, enter name, click Save	Exported custom parser stored in file system.	RCPTT	Pass	
2.5	Delete (text)	Select custom parser, click Delete	Custom parser is deleted.	SWTBot	Pass	
2.6	Import (text)	Click Import, find custom parser definition, click Open	Imported custom parser appears in list.	RCPTT	Pass	
		Select "XML" radio button, click New button, enter Log Type, write an xml log in the input, <a><b><c>1</c></b></a> <b><c>2/ c&gt;<d>1<b>&gt;c&gt;2/ then click on the "feeling lucky" button. Set b to log entry, set c to timestamp logged and d to message logged, set timestamp format to ss in both text boxes, click Next, click</b></d></c></b>				
2.7	New (XML)	Finish	Custom parser appears in list.	Manual	Pass	
2.8	Edit (XML)	Select custom parser, click Edit, change stuff, click Next, click Finish	Previously entered data appears, can be edited.	Manual	Pass	
2.9	Export (XML)	Select custom parser, click Export, enter name, click Save	Exported custom parser stored in file system.	Manual	Pass	
2.10	Delete (XML)	Select custom parser, click Delete	Custom parser is deleted.	SWTBot	Pass	
2.11	Import (XML)	Click Import, find custom parser definition, click Open	Imported custom parser appears in list.	Manual	Pass	
3	Custom parser trace handling					

4.3.0-TraceCompassTestCases

Custom Parsers

3.1	Select trace type (text)	Select test file in Traces folder, right-click, select "Select Trace Type > Custom Text > (parser name)"	Trace type is assigned (re-open Select Trace Type sub-menu to verify)	RCPTT	Pass	Or select the trace and verify the trace type in the properties view
3.2	Open trace (text)	Double-click on test file in Traces folder	Editor opens with events table, Time Chart view is populated.	Manual	Pass	
3.3	Raw view (text)	Right-click in editor, click Show Raw	Editor is split with raw view on right pane.	Manual	Pass	
3.4	Time synchronization (text)	Click in Time Chart view, select event in editor table, select event in raw view	All three widgets synchronize to selected time.	Manual	Pass	
3.5	Select trace type (XML)	Select test file in Traces folder, right-click, select "Select Trace Type > Custom XML > (parser name)"	Trace type is assigned (re-open Select Trace Type sub-menu to verify)	RCPTT	Pass	
3.6	Open trace (XML)	Double-click on test file in Traces folder	Editor opens with events table, Time Chart view is populated.	Manual	Pass	
3.7	Raw view (XML)	Right-click in editor, click Show Raw	Editor is split with raw view on right pane.	Manual	Pass	
3.8	Time synchronization (XML)	Click in Time Chart view, select event in editor table, select event in raw view	All three widgets synchronize to selected time.	Manual	Pass	
4	Raw viewer					should this be in events editor?
4.1	Show Raw Viewer	Open Custom text trace     Right-click in table and select "Show Raw"	Raw viewer is shown beside the events table	Manual	Pass	
4.2	Hide Table	Right-click in table and select "Hide Table"	Events table is hidden and only raw viewer is shown	Manual	Pass	
4.3	Show Table	Right-click in raw viewer and select "Show Table"	Events table is shown beside raw viewer	Manual	Pass	
4.4	Select Event (Bug 457852)	Select event in raw viewer	Correct event is select in table, timestamp is propagated to other TMF views and Properties view shows content of selected event	Manual	Pass	
4.5	Select Event using arrow keys (457852)	select event in raw viewer with mouse     use arrow key down and up several     times	Correct event is select in table, timestamp is propagated to other TMF views and Properties view shows content of selected event	Manual	Pass	
4.6	Hide Raw viewer	Right-click in table and select "Hide Raw"	Raw viewer is hidden and only events table is shown	Manual	Pass

4.3.0-TraceCompassTestCases Flame Chart View

	Section	Pass	Fail		To Do	Comment
	TMF - Flame Chart View	24	0	14	0	11
Target:	Ubuntu 16.04 64 bit (ELX)					
Step	Test Case	Action	Verification			Comment
<u>0</u>	Download the test resources	Download this				
1	Preparation					
		Use menu Window → Show View → Other →				
1.1	Open TMF Flame Chart View	Tracing → Flame Chart	Verify that 'Flame Chart' view is shown	SWTBot	Pass	Path is actually Window -> Show view -> Tracing -> Flame Chart
1.2	T	Import a trace that does not have any call stack information, like a standard kernel trace	Verify that nothing is shown in the view, except "Stack info not available ( <tracename>)"</tracename>	M1	D	V. 15. 11. 4. 16.0010 410.000M
1.2	Import generic trace	information, like a standard kernel trace	Stack into not available ( <tracename>)</tracename>	Manual	Pass	Verified in Aug. 16-2018 at 12:08PM
1.3	Import cyg-profile trace	Import the trace in the "trace" directory of the downloaded zip	Verify that the Flame Chart View is populated with some callstack information.	SWTBot	Pass	
	T	Import a trace in the "trace-fast" directory of the	Verify that the Flame Chart View is populated with	GILIZED .	D.	
1.4	Import cyg-profile-fast trace	downloaded zip	some callstack information.	SWTBot	Pass	
2	Manage View					
2.1	Delete view	Close the Flame Chart View	Flame Chart' view is removed from perspective	Manual	Pass	Verified in Aug. 16-2018 at 12:08PM
		Use menu Window $\rightarrow$ Show View $\rightarrow$ Other $\rightarrow$				,
2.2	Open view	Tracing → Flame Chart	Flame Chart' view is displayed and re-populated	SWTBot	Pass	See comment 1.1. about the path
2.3	Open Trace	Open "trace(-fast)" trace	Verify that view is populated with call stack information	SWTBot	Pass	
2.3	Open Trace	1) Close 'Flame Chart' view	information	SWIBOU	Pass	
2.4	Open view when trace is already loaded	Dopen "glxgears-cyg-profile(-fast)" trace located in the git in ctf test     Open "Flame Chart' view	Verify that view is populated with call stack information	SWTBot	Pass	
2.5	Open Experiment	Open Experiment with 2 or more Flame Chart traces.  (You can use both traces)	Verify that view is populated with all call stack information (separated by trace).	Manual	Pass	
		Select different trace by clicking its Events editor				
2.7	Select other trace	tab	View is updated to show selected trace.	Manual	Pass	
2.6	Restart	Restart Eclipse with Flame Chart trace opened	Verify that view is populated with call stack from trace	Manual	Pass	
2.7	Close all traces	Close traces and experiment one by one from the editor tab	Verify that Flame Chart view is cleared after closing the last trace	Manual	Pass	
3	Navigation					
3.1	Select time	Click on random time in the time graph pane	Selected time line is updated. Table is updated to show the full stack information at the selected time. Selected time is updated in other views.	SWTBot	Pass	
3.2	Select Previous/Next Event	Click Previous/Next Event button	Previous or next call stack change is selected and corresponding active function and stack depth is selected. Table is updated to show the full stack information at the selected time. Selected time is updated in other views.	SWTBot	Pass	
3.3	Zoom to function (table)	Double-click on a function in the table pane	Time range is updated to the full duration of the selected function	SWTBot	Pass	
3.4	Zoom to function (time graph)	Double-click on a function (interval) in the time graph pane	Time range is updated to the full duration of the selected function	SWTBot	Pass	
3.5	Go to first event in trace	Go to events editor, press home	the Flame Chart view is updated	Manual	Pass	Fixed in https://git.eclipse.org/r/#/c/80177/1 Hung:Verified in Aug. 16-2018 at 13:39PM

4.3.0-TraceCompassTestCases Flame Chart View

					37/4	
					N/A	
4	Synchronization					
4.1	Time synchronization	Select a random time in another view	Selected time line is updated. Table is updated to show the full stack information at the selected time. If selected time is outside current range, time range is updated to include it.	SWTBot	Pass	The vertical scroll bar is not updated(Sonia: only when you select a rendom time in the histogram view). If you select an event (in another view) before the start of the calls, the vertical scroll bar goes down.
4.2	Event synchronization	Select a call stack-impacting event (function entry/exit) in events table	In addition to updating the selected time, the active function at the event time is selected. Vertical scroll bar is updated if necessary.	SWTBot	Pass	
4.3	Time range synchronization	Select a new time range in Histogram view.	Time range is updated.	SWTBot	Pass	
5	Function name import - Text file					
5.1	Invalid text file import	Open 'trace' from Fibonacci.zip. Click the "Select a mapping file" button in the view and click "Browse" to select a random .txt file that does not contain any debugging info.	The function addresses do not change.	Manual	Pass	Verified in Aug. 16-2018 at 14:46PM
5.2	Valid text file import	Import a file "fibonacci.symbols"	The view now displays function names instead of function addresses (both in the timegraph and the call stack areas).	SWTBot	Pass	The symbol mapping is applied on view level. If multiple traces are opened, or if an experiment with multiple traces is opened, they cannot each have their own mapping. Bug 459909.  France: 1 am not sure what to do here Sonia: The bug is resolved, you can specify a mapping file for each trace if you have a multiple traces in one experiment.
6	Function name import - CDT					
6.1	Binary import	Click the "Select a binary file" button in the view and click "Browse" to select the fibonacci executable (fibonacci).	The view now displays the function names for both traces	Manual	Pass	Sonia :you have to specify the binary file for each trace. The view won't display the function names for the both traces if we select the fibonacci executable for a trace in an experiment with multiple traces. Hung: Verified in Aug. 16-2018 at 14:47PM
6.2	Binary import lttng 2.8+	Open an lttng 2.8+ trace with the executable present	The view now displays the function names for the trace	Manual	Pass	Verified in Aug. 16-2018 at 14:468PM

	Section	Pass	Fail	Туре	To Do	Comment	
	LTTng 2.0 - CPU Analysis	27	0	5	0	0	
Target:	Ubuntu 16.04 64 bit (ELX)						
Step	Test Case	Action	Verification	Туре		Comment	
0	Prerequisites						
· ·	riciequisices	Import LTTng Kernel traces in					
0.1	Import traces	Tracing project					
1	Project View						
1.1	Check analysis can execute	In the project explorer and expand a LTTng Kernel trace	"CPU usage" analysis is present and it's not crossed out	Manual	Pass		84702
1.2	Verify help message when applicable	In the project explorer, open and expand the LTTng kernel trace, right-click the CPU usage analysis and select Help	A generic help message appears with the name of the analysis	Manual	Pass		
1.5	Check analysis for another trace type	In the project explorer, expand a non-LTTng Kernel trace	"CPU usage" analysis is not present	Manual	Pass		84702
2	View Management					_	
2.1	Populate analysis's view	Open an LTTng kernel trace and expand the "CPU usage" analysis in the project explorer	"CPU Usage" View appears under the analysis	Manual	Pass		
2.2	Open view	Double-click the CPU usage View under the CPU usage analysis	The CPU usage Usage view opens and triggers the cpu analysis. After the analysis, both tree viewer and xy charts are populated.	SWTBot	Pass		
2.3	Close trace	Close the trace	The CPU Usage view is emptied.	Manual	Pass		
2.4	Open trace	With the view already opened, open the trace	The CPU Usage view is populated.	SWTBot	Pass		
2.5	Close view	Close the CPU Usage view	The view is closed.	Manual	Pass		
2.6	Re-open view	Double-click the CPU Usage view under the CPU usage analysis in project explorer.	The view opens and is automatically populated.	SWTBot	Pass		
3	View selection	ргојест ехріогет.	automatically populated.	SW I DOL	1 455		
3.1	Select an entry	Select an entry in the tree viewer section	A new series is added to the xy chart, corresponding to the selected TID	SWTBot	Pass		
		Select another entry from the tree	A new series is added to the xy chart, and the previous TID's				Christophe: not sure I understand. Multiple series can be selected; when selecting a 2nd series, the first one is still displayed. Simon: I think this is old and refers to an older view. With the new tree view the behavior is as
3.2	Select another entry	viewer	series is not displayed anymore	Manual	Pass		you described
4	Mouse handling						

4.3.0-TraceCompassTestCases LTTng 2.0 - CPU analysis

4.1	Drag move time range	Drag move xy chart left and right with middle button and shift mouse wheel	Time range is dragged. When mouse button is released, series are updated and new time range is propagated to other views.	Manual	Pass	
4.2	Zoom time range (mouse wheel)	Zoom with ctrl mouse wheel up and down, cursor inside xy chart	Time range is zoomed in and out, relative to mouse cursor. When mouse wheel is stopped for a short time, series are updated and new time range is propagated to other views, including the tree viewer beside the chart. The selected process remains the same.	SWTBot	Pass	
4.3	Mouse vertical scroll	Scroll with mouse wheel up and down, cursor outside xy chart	Table scroll up and down. Selected process does not change. Vertical scroll bar updated.	Manual	Pass	
4.4	Vertical scroll bar	Click and drag vertical scroll bar	Tree viewer scrolls up and down. Selected process does not change.	Manual	Pass	Objeted
4.5	Drag select time range	Drag select time graph with right button in xy chart	Selection highlighted. When mouse button is released, time range is zoomed to selection, series are updated and new time range is propagated to other views. Selected process remains the same.	Manual	Pass	Christophe: selected process is lost if the new time range does not contain data from the process, even when zooming back out. Not sure if it should be marked as a fail.
		Hover mouse in xy chart region	Tool tip shows the total and selected process (if any) cpu	111111111111111111111111111111111111111		maned de d idiii
4.6	Mouse hover	anywhere	usage at the time	Manual	Pass	
4.7	Drag mouse selection	Drag select xy chart with left button	Selection highlighted and selection range is propagated to other views	Manual	Pass	
4.8	Shift key selection	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted and selection rang is propagated to other views	Manual	Pass	
4.9	Sort columns	Click on column headers once then twice	Entries are sorted in ascending then descending order on the column value. Selected process does not change.	Manual	Pass	Simon: Sometime with GTK3 sorting by column cause the process column to add extra padding between the checkbox and the label. On GTK2 everything seems fine

4.3.0-TraceCompassTestCases LTTng 2.0 - CPU analysis

4.10	Drag mouse selection (Status bar)	Drag select xy chart with left button	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (draggged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass		
4.11	Shift key selection (Status bar)	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (draggged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass		
5	Keyboard handling						
5.1	Keyboard navigation in tree viewer	With focus on table, use UP, DOWN, HOME, END keys	Selected process is changed. xy chart selection is updated. Vertical scroll bar updated.	Manual	Pass		
6	Synchronization						
6.1	Time synchronization	Select a random time in another view	Selected time line is updated. If selected time is outside current range, time range is updated to include it.	Manual	Pass		
6.2	Time range synchronization	Select a new time range in CPU usage view or in Histogram view.	Time range is updated.	Manual	Pass		
6.3	Time range selection synchronisation	In any other view that supports range synchronization, select a new range.	Selection is highlighted. If the most left time (T1) of selected time range is outside the current range, then time range is updated to include it	Manual	Pass		
	CPU usage works with experiments			Manual	Pass	l -	works with 1 kernel trace experiments

5.9	Cut/Paste	Redo 5.1 - 5.8 with cut and paste	Successful cut and paste	RCPTT	Pass	Trace (5.7) is done with SWTBot
6	Edit Profile - Adverserial					
6.1	Error empty profile name	Clear profile name	Error message "Profile must not be empty"	RCPTT	Pass	
6.2	Duplicate profile name	Add profile with name of existing profile	Error message " <name>: Duplicate profile name"</name>	RCPTT	Pass	
6.3	Error empty Connection node name	Clear Connection node name	Error message "Node name must not be empty"	RCPTT	Pass	
6.4	Duplicate Connection node name	Within a profile, add Connection node with name of existing node	Error message "Duplicate node names"	RCPTT	Pass	
0.4	Bupileate Connection node name	existing node	Error message "URI must include user	KCI I I	1 433	
6.5	Missing username in URI	remove user name of a Connection Node	information"	RCPTT	Pass	
			Error message "URI must include valid host and	n on mm		
6.6	Invalid URI	add invalid URI	port number" or "Unsupported URI scheme"	RCPTT	Pass	
6.7	Error empty Trace Group	Delete Trace Group root path	Error message "Root path must not be empty"	RCPTT	Pass	
6.8	Error empty Trace	Delete File Pattern	Error message "File pattern must not be empty"	RCPTT	Pass	
6.9	Invalid File pattern	Add trace with invalid regular expression	Error message "Invalid file pattern"	RCPTT	Pass	
5	Export/Import Profile					
7.1	Export Profile	Select multipe profiles > Click Export Button > Select Folder and enter file name > OK	Only selected profiles are exported	SWTBot	Pass	
		Click on Import Button > select profile XML file >				
7.2	Import Profile	OK	Profiles are imported	SWTBot	Pass	
7.3	Import Profile	Redo 7.2	after second import an error message appears "Duplicate profile names"	SWTBot	Pass	
7.5	import i rome	1000 7.2	Suprieure promo numes	5 W I Bot	- 400	
8	Remote Fetch Wizard					
		1) Generate CTF trace in <plugin>/generated/synthetic-trace</plugin>				
		2) Import profiles from <plugin>/profiles/test-</plugin>				
8.1	Preparation	profiles.xml		SWTBot	Pass	
8.2	Create and run Profile "new Profile" (syslog + synthetic CTF trace in sub-directory)	1) Create Profile with Local connection, 1 trace group (root /tmp/traces/) and 2 traces (.*syslog.* and . *synthetic.*) in this group 2) Select profile in Fetch Remote Traces wizard (Remote Profile page) 3) Click on 'Next' button 4) Click on 'Finish'	Verify that all test traces are imported with correct trace types assigned. Verify that folder structure is preserved.	SWTBot	Pass	Local connection is used in SWTBot
	Clear traces	Delete all traces from Traces directory	All traces deleted			
8.3	Create and run Profile "new Profile" (syslog + synthetic CTF trace in sub-directory), only 1 trace selected	1) Create Profile with Local connection, 1 trace group (root /tmp/traces/) and 2 traces (.*syslog.* and .*synthetic.*) in this group 2) Select profile in Fetch Remote Traces wizard (Remote Profile page) 3) Click on 'Next' button	Verify that only the selected traces are imported with correct trace types assigned. Verify that folder structure is preserved.	SWTBot	Pass	Local connection is used in SWTBot
	Clear traces	Delete all traces from Traces directory	All traces deleted			

8.4	Run Profile "TestAllRecursive"	Select profile "TestAllRecursive" in Fetch Remote Traces wizard (Remote Profile page)     Click on 'Next' button (enter password if needed)     Click on 'Finish'	Verify that all test traces are imported with correct trace types assigned (LTTng kernel, LTTng UST, custom text, custom XML). The file unrecognized log is importeds with unrecognized trace type.  Make sure that directory structure is preserved.	SWTBot	Pass	Local connection is used in SWTBot
8.5	Re-run Profile "TestAllRecursive" (Rename)	Select profile "TestAllRecursive" in Fetch Remote Traces wizard (Remote Profile page)     Click on 'Next' button (enter password if needed)     Click on 'Finish'     In dialog box select 'Rename' for the first trace and 'Rename ALL' for the second traces	name and correct trace types assigned (LTTng kernel, LTTng UST, custom text, custom XML). The file unrecognized log is importeds with	SWTBot	Pass	Local connection is used in SWTBot
8.6	Re-run Profile "TestAllRecursive" (Overwrite)	Select profile "TestAllRecursive" in Fetch Remote Traces wizard (Remote Profile page)     Click on 'Next' button (enter password if needed)     Click on 'Finish'     In dialog box select 'Overwrite' for the first trace and 'Overwrite ALL' for the second traces	Verify that all test traces are imported with correct trace types assigned where old traces are overwritten. (LTTng kernel, LTTng UST, custom text, custom XML). The file unrecognized log is importeds with unrecognized trace type. Make sure that directory structure is preserved.	SWTBot	Pass	Local connection is used in SWTBot
8.7	Re-run Profile "TestAllRecursive" (Skip)	Select profile "TestAllRecursive" in Fetch Remote Traces wizard (Remote Profile page)     Click on 'Next' button (enter password if needed)     Click on 'Finish'     In dialog box select 'Skip' for the first trace and 'Skip ALL' for the second traces	Verify that all test traces are skipped and no trace is imported	SWTBot	Pass	Local connection is used in SWTBot
8.8	Re-run Profile "TestAllRecursive" (Overwrite 2)	1) Select profile "TestAllRecursive" in Fetch Remote Traces wizard (Remote Profile page) 2) Select checkbox 'Overwrite traces without warning' 3) Click on 'Next' button (enter password if needed) 4) Click on 'Finish'	Verify that all test traces are imported with correct trace types assigned where old traces are overwritten (no dialog box opens). (LTTng kernel, LTTng UST, custom text, custom XML). The file unrecognized.log is importeds with unrecognized trace type. Make sure that directory structure is preserved.	SWTBot	Pass	Local connection is used in SWTBot
	Clear traces	Delete all traces from Traces directory	All traces deleted			
8.9	Re-run Profile "TestAllRecursive" (2)	Select profile "TestAllRecursive" in Fetch Remote Traces wizard (Remote Profile page)     Click on 'Finish' (enter password if needed)	Verify that all test traces are imported with correct trace types assigned. The second page is omitted. (LTTng kernel, LTTng UST, custom text, custom	SWTBot	Pass	Local connection is used in SWTBot
	Clear traces	Delete all traces from Traces directory	All traces deleted			
8.10	Run Profile "TestAllNonRecursive"	Select profile "TestAllNonRecursive" in Fetch Remote Traces wizard (Remote Profile page)     Click on 'Next' button (enter password if needed)     Click on 'Finish'	Verify that only traces from root path are imported (LTTng kernel, LTTng UST, custom text, custom XML). The file unrecognized.log is importeds with unrecognized trace type. Make sure that directory structure is preserved.	SWTBot	Pass	Local connection is used in SWTBot
	Clear traces	Delete all traces from Traces directory	All traces deleted			
	Run Profile "TestSpecificRecursive"	Select profile "TestSpecificRecursive" in Fetch Remote Traces wizard (Remote Profile page)     Click on 'Next' button (enter password if needed)     Click on 'Finish'	Verify that only kernel and custom text/XML logs are imported from root and subdirectory. Make sure that directory structure is preserved.	SWTBot	Pass	Local connection is used in SWTBot
8.11	Clear traces	Delete all traces from Traces directory	All traces deleted			
8.11		1				
8.11	Run Profile "TestSpecificNonRecursive"	Select profile "TestSpecificNonRecursive" in Fetch Remote Traces wizard (Remote Profile page)     Click on 'Next' button (enter password if needed)     Click on 'Finish'	Verify that only kernel and custom text/XML logs are imported from root directory only. Make sure that directory structure is preserved.	SWTBot	Pass	Local connection is used in SWTBot

8.13	Run Profile "TestSpecificMutliGroupRecursiv e"	Select profile "TestSpecificMultiGroupRecursive" in Fetch Remote Traces wizard (Remote Profile page)     Click on 'Next' button (enter password if needed)     Click on 'Finish'	Verify that only traces from root path are imported (LTTng kernel, LTTng UST, custom text, custom XML). Make sure that directory structure is preserved.	SWTBot	Pass	Local connection is used in SWTBot
	Clear traces	Delete all traces from Traces directory	All traces deleted			
8.14	Cancel Import	Select profile "TestAllRecursive" in Fetch Remote Traces wizard (Remote Profile page)     Click on 'Next' button (enter password if needed)     Click on 'Finish'     Cancel import (red square or Cancel button)	Verify that import operation is cancelled	SWTBot	Pass	Local connection is used in SWTBot
	Clear traces	Delete all traces from Traces directory	All traces deleted			
8.15	Run Profile "TestMultiNodes"	Select profile "TestMultiNodes" in Fetch Remote Traces wizard (Remote Profile page)     Click on 'Next' button (enter password if needed)     Click on 'Finish'	Verify that only traces from root path are imported (LTTng kernel, LTTng UST, custom text, custom XML). The file unrecognized.log is importeds with unrecognized trace type. Make sure that directory structure is preserved. 2 nodes directories are created with the above traces stored	SWTBot	Pass	Local connection is used in SWTBot
9	Connection Handling		O			
9.1	Error cannot connect to remote host (node doesn't exist)	Create profile with IP address that cannot be connected to and run profile	Operation to connect to remote node fails and error dialog is shown with detailed information (after time-out)	SWTBot	Pass	
9.2	Error cannot connect to remote host (wrong password)	Create profile with valid IP address. When asked for password enter invalid password	Operation to connect to remote node fails with time-out and error dialog is shown with detailed information. Note time-out is as per remote development preferences	Manual	Pass	Verified in Aug. 22-2018 at 11:46AM. SWTBot test can be run locally by removing the @Ignore tag
10	Other Remote Backends					
	Clear traces	Delete all traces from Traces directory	All traces deleted			
10.2	Remote Fetch using SSH	Update profile with local username and run test 9.2 entering the correct password	Verify that all test traces are imported with correct trace types assigned (LTTng kernel, LTTng UST, custom text, custom XML). The file unrecognized log is importeds with unrecognized trace type. Make sure that directory structure is preserved.	Manual	Pass	

	Section	Pass	Fail	Туре	To Do	Comment
	LTTng 2.0 - Control Flow View	52	0	15	0	0
Target:	Windows					
Step	Test Case	Action	Verification			Comment
0	Prerequisites					
	Trerequisites					
0.1	Import traces	Import LTTng Kernel traces in Tracing project				
0.2	Create experiment	Create an experiment with LTTng Kernel traces				
1	View management					
1.1	Open perspective	Open and reset LTTng Kernel Perspective	Control Flow view opens.	SWTBot	Pass	
1.2	Open trace		Control Flow view is populated with processes, sorted by Trace then TID. Child processes appear under their parent, sorted by birth time. Range is set to initial offset. Arrows are drawn between states of a CPU.	SWTBot	Pass	
1.2	Open experiment	Open experiment with LTTng Kernel traces in Project Explorer	Control Flow view is populated with processes, sorted by Trace then TID. Child processes appear under their parent, sorted by birth time. Range is set to initial offset. Arrows are drawn between states of a CPU.	Manual	Pass	
1.3	Close view	Close the Control Flow view	View is closed.	SWTBot	Pass	
1.4	Open view	Open the Control Flow view	Control Flow view is opened and populated with processes.	SWTBot	Pass	
2	View selection	open the control from view	mai processes.	SWIBOU	1 435	
2.1	Select process in table	Select a process in the table	Same process is highlighted in time graph.	Manual	Pass	
2.2	Select process in time graph	Select a process in the time graph (empty region)	Same process is highlighted in table. Selected time line is updated. Other views are synchronized to selected time.	Manual	Pass	
2.3	Select state in time graph	Select a state in the time graph	Same process is highlighted in table. State is highlighted in time graph. Selected time line is updated. Other views are synchronized to selected time.	Manual	Pass	
3	Mouse handling					
3.1	Drag move chart area	Ctrl-Drag move time graph left and right with middle button	Visible range is dragged. When mouse button is released, states are updated and new time range is propagated to other views.	Manual	Pass	
3.2	Zoom time range (mouse wheel)	Zoom with mouse wheel up and down, cursor inside time graph while holding the Ctl button		Manual	Pass	
3.3	Zoom time range (mouse drag)	Drag in time graph scale left and right with left button	Time range is zoomed in and out. When mouse button is released, states are updated and new time range is propagated to other views.	Manual	Pass	
3.4	Mouse vertical scroll	Scroll with mouse wheel up and down	Table and time graph scroll up and down and remain aligned. Selected process does not change. Vertical scroll bar updated.	Manual	Pass	
3.5	Vertical scroll bar	Click and drag vertical scroll bar	Table and time graph scroll up and down and remain aligned. Selected process does not change.	Manual	Pass	

3.6	Drag zoom time range	Drag select time graph with right button	Selection highlighted. When mouse button is released, time range is zoomed to selection, states are updated and new time range is propagated to other views.	Manual	Pass	
			Time range is reset to full range, states are updated and new time range is propagated to			
3.7	Double-click reset time range	Double-click left button on time scale	other views.	Manual	Pass	
3.8	Mouse hover (empty region)	Hover mouse in time graph over empty region	Tool tip shows process name only.	Manual	Pass	
3.9	Mouse hover (state)	Hover mouse in time graph over state	Tool tip shows process name, state name, date, start time, stop time, duration. For USERMODE state, CPU is shown. For SYSCALL state, CPU and System Call is shown. For INTERRUPTED state, CPU is shown.	Manual	Pass	
3.10	Drag mouse selection	Drag select time graph with left button	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass	
3.11	Shift key selection	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass	
4	Keyboard handling					
4.1	Keyboard navigation in time graph (process selection)	With focus on time graph, use UP, DOWN, HOME, END keys	Selected process is changed. Table selection is updated. Vertical scroll bar updated.	Manual	Pass	
4.2	Keyboard navigation in time graph (state selection)	With focus on time graph, use LEFT, RIGHT keys	Previous or next state is selected. Selected time is updated in other views.	SWTBot	Pass	
5	Tool bar handling					
5.1	Show Legend	Click Show Legend button	The legend dialog is opened and can be closed.	SWTBot	Pass	
5.2	Reset Time Scale	Click Reset Time Scale button	Time range is reset to full range, states are updated and new time range is propagated to other views.	SWTBot	Pass	
5.3	Select Previous/Next Event	Click Previous/Next Event button	Previous or next state is selected. Selected time is updated in other views.	SWTBot	Pass	
5.4	Select Previous/Next Process	Click Previous/Next Process button	Selected process is changed in table and time graph. Vertical scroll bar updated.	Manual	Pass	
			Time range is zoomed in and out, relative to center of selection or window. States are updated and new time range is propagated to			
5.5	Zoom In/Out	Click Zoom In/Out button	other views.	Manual	Pass	
5.6	Filter Dialog	Open Filter Dialog	Verify that all buttons are working correctly	SWTBot	Pass	
5.7	Filter Processes	Open Filter Dialog     Deselect several processes     Press Ok	Verify that only selected processes are displayed in the view	SWTBot	Pass	
5.8	Hide Arrows	Click Hide Arrows button	Verify that arrows are not drawn in the time graph	Manual	Pass	
5.9	Follow CPU Forward	With focus on time graph, click Follow CPU Forward button	Time graph is updated to show the next state for this cpu following the arrow, the event is selected in the Events editor.	SWTBot	Pass	

5.10	Follow CPU Backward	With focus on time graph, click Follow CPU Backward button	Time graph is updated to show the previous state for this cpu following the arrow, the event is selected in the Events editor.	SWTBot	Pass	
5.11	Optimize	Click on the optimize button	verify that the processes are closer together.	SWTBot	Pass	
			verify that the processes did not move, the			
5.12	Re-Optimize	Click on the optimize button a few more times	optimization is stable	SWTBot	Pass	
5.13	Go to next event of selected thread	Select a thread and click on go to next event of selected thread	Verify in the events table that the selected thread is the same as the previous event	Manual	Pass	
5.14	Go to previous event of selected thread	Select a thread and click on go to previous event of selected thread	Verify in the events table that the selected thread is the same as the previous event	Manual	Pass	
6	Synchronization					
6.1	Time synchronization	Select a random time in another view	Selected time line is updated. If selected time is outside current range, time range is updated to include it.	Manual	Pass	
6.2	Event synchronization	Select a state-impacting event (sched_switch, syscall,) in events table or in Resources view using Select Previous/Next event.	In addition to updating the selected time, the process containing the state change is selected and revealed. Vertical scroll bar is updated if necessary.	Manual	Pass	
6.3	Window range synchronization	Select a new window range in Resources view or in Histogram view.	Window range is updated.	Manual	Pass	
6.4	Selection range synchronization	In any other view that supports selection range synchronization, select a new range.	Selection is highlighted. If the left time (T1) of selected time range is outside the current range, then window range is updated to include it	Manual	Pass	
0.1	Colodien range synomenization	range synometrization, coloct a new range.	indiado it	Triunuui	1 400	
7	Multiple Trace Synchronization					
	Preparation	1) Download traces.zip (if necessary) and unzip into a local directory \${local} 2) Import kernel trace \${local} /traces/import/kernel-overlap-testing 3) Import UST \${local} /traces/import/trace ust-overlap-testing 4) Create experiment with trace of 2) in it				
7.1	Open multiple traces (no overlap)	Open multiple traces that don't overlap in time	View shows the last opened trace	Manual	Pass	
	Change selected time and range (no		Selected time line and time range is updated to			
7.2	overlap)	Select a time and new range	selected time and new range.	Manual	Pass	
7.3	Select other trace (no overlap)	Select different trace by clicking its Events editor tab	View is updated to show selected trace. Selected time line and time range are restored to the selected trace's previously selected time and range.	Manual	Pass	
7.4	Open multiple traces (overlap)	- Open multiple traces that overlap in time - For both traces, in Events table right mouse- click -> "Follow time updates from other traces"	View shows the last opened trace	Manual	Pass	
7.5	Change selected time and range (overlap)	Select a time and new range	Selected time line and time range is updated to selected time and new range.	Manual	Pass	
			View is updated to show selected trace. Selected time line and time range are set to the newly			
7.6	Select other trace (overlap)	tab	selected time and range.	Manual	Pass	

8.1	Filtering					
	Preparation	Open 2 LTTng Kernel Traces				
8.1	Apply filter (1st trace)	Open filter dialog     Create filter     Click on OK	Make sure that only selected processes of filter dialog are shown	SWTBot	Pass	
8.2	Apply filter (2nd trace)	1) Switch to 2nd trace (keep 1st open) 2) Open filter dialog 3) Create filter 4) Click on OK	Make sure that only selected processes of filter dialog are shown	Manual	Pass	
8.3	Persitent filter	Switch between both open traces	Make sure that previously set filter are still available	Manual	Pass	
9	Miscellaneous					
9.1	Restart (Bug 409345)	Open LTTng Kernel Trace     Select Control Flow View     Restart Eclipse	Verify that Control Flow View is populated	Manual	Pass	
9.2	Select single time (Bug 477009)	Open LTTng UST trace while CFV is open     Select event in events table	Verify that Control Flow View is empty, current window range stays change to ensure visibility	Manual	Pass	
9.3	Window range synchronization (Bug 477012)	1) Open Control Flow view, Resources view and a kernel trace. Initial window range is 'range 1'. 2) Go "right one page" on Control Flow view by pressing right arrow in scroll bar. 3) Go "left one page" on Resources view by pressing left arrow in scroll bar. 4) Go "right one page" on Control Flow view.	Verify that after each step the initial window range doesn't change	Manual	Pass

	LTTng 2.0 - Control View	131	0	118	0	32				
Target:	Ubuntu 16.04 64 bit									
	LTTng Tools 2.9.6, Built-in SSH									
Step	Test Case	Action	Verification	Type		Comment				
				- ''						
0	Prerequisites									
		For the tests below a Ubuntu machine with LTTng 2.0 installed (with lttng tools 2.5.x or later) is required. Make sure that the								
		root session daemon is running (sudo lttng list -k) and have one								
		UST process running (e.g. from lttng-tools git repository under tests/hello.cxx)	LTTng Tracer Control User Guide: http:							
		a) Window → Preferences → General → Network Connections								
0.1	Set Proxy	b) Set "Active Provider" to "Direct"								
1	General									
			LTTng Kernel perspective opens with correct Control view on the left bottom							
1.1	Open perspective	Open and reset LTTng Kernel Perspective	corner	SWTBot	Pass					
2	Manage View									
2.1	Close view	Close Control View	Control view is removed from perspective	Manual	Pass					
2.2	Open Control view	Use menu Window $\rightarrow$ Show View $\rightarrow$ Other $\rightarrow$ Lttng $\rightarrow$ Control	Verify that Control view is shown	SWTBot	Pass					
3	Connection Handling		Make sure that after 4) the new			•				
			connection is shown in the tree. Verify that the new host is shown in the							
			Control view (with 'Connection Name'. After Ssh connection has been							
		Click Button 'New Connection'     Select Tree item "Built-in SSH" and click on Create	established, make sure that Provider and Session nodes are created in the							
		Enter Connection Name (e.g. MyHost), enter Host Name (a DNS name or IP address), username and password	Control view underneath the host. Verify that all active Providers (Kernel							
3.1	Create Host Connection	4) Click 'Finish' 5) In Tree select the newly create connection and click on 'Ok'	and UST providers) are shown under the 'Provider' node.	RCPTT	Pass					
		a) Select host to disconnect and click Button 'Disconnect'	Verify that icon for the corresponding node changes to the disconnect icon							
3.2	Disconnect	b) Redo test with context sensitive menu item 'Disconnect'	and all sub-nodes are removed.	RCPTT	Pass					
			Verify that icon for the corresponding node changes to the connected icon							
		a) Select host to connect and click Button 'Connect'	and after successful SSH connection all data is retrieved form the remote							
3.3	Connect	b) Redo test with context sensitive menu item 'Connect'	host (Providers, sessions etc).	RCPTT	Pass					
		Restart Eclipse     Click Button 'New Connection'	Make sure that SSH connection is							
		Select the host previously created     Select 'Ok'. (Afterwards enter user ID and Password if	established and all data is retrieved from the remote host ( (Providers,							
3.4	Select Host Connection	necessary)	sessions etc).	RCPTT	Pass					
			Verify that menu items are shown and enabled/disabled depending on state:							
			'Connect' (disabled) Disconnect (enabled)							
3.5		Connect to remote host     Select connected node and click right mouse button	Refresh (enabled)  Delete (disabled)	RCPTT	Pass					
0.0	ca (riost connected)	2) select connected node and click right modes button		ACTII	1 055					
			Verify enable state of view buttons: 'New Connection' (enabled)							
			'Connect' (disabled) 'Disconnect' (enabled)							
			'Refresh' (enabled) 'Delete' (disabled)							
			'Start' (disabled) 'Stop' (disabled)							
_	View button enable state	1) Connect to remote host (if necessary)	'Destroy Session' (disabled) 'Record Snapshot' (disabled)							
3.6	(host connected)	2) select connected node	'Import' (disabled)	RCPTT	Pass					
			Verify that menu items are shown and enabled/disabled depending on state:							
	Node contexts sensitive	Disconnect from node	'Connect' (enabled) 'Disconnect' (disabled) 'Refresh' (disabled)							
3.7	menu (host disconnected)	Disconnect from node     select disconnected node and click right mouse button	'Refresh' (disabled) 'Delete' (enabled)	RCPTT	Pass					
			Verify enable state of view buttons:

16.6	(Level 2)	Execute some commands (e.g. create session, enable event)     Execute 16.2	Make sure that log file contains the executed commands with -vvv option (e.g. ltmg -vvv create session) and the	RCPTT	Pass	This makes no difference for MI starting with Lttng 2.6					
16.7	Test Verbose Logging (Level 3)	select verbose level Level 3     Execute some commands (e.g. create session, enable event)	Verify that tracer control preferences are persisted and the log file is opened	RCPTT	Pass	This makes no difference for MI starting with Lttng 2.6					
16.8	Append Mode	Check checkbox Append, restart Eclipse and open Tracer Control Preferences	in append mode (old file is not overwritten)  Verify that Ittng command is executed with command line option -g <group>.</group>	RCPTT	Pass						
16.9	Change Tracing Group Change execution	Change Tracing group (e.g. tracing2) and execute a command (while logging enabled)	Ignore any command reply errors (if any)  After verify that values smaller than 5	RCPTT	Pass						
16.10	timeout	Go to Remote Connection Preferences, Change Timeout	and bigger than 600 are rejected	RCPTT	Pass						
16.11	Reset	Reset to defaults	Verify: Group=tracing, Logging is deselected, Append is deselected, Verbose Level=None), and Command Timout is 15	RCPTT	Pass						
17	Create Channel with advance features (LTTng 2.2 features)										
17.1		For the tests below a Ubuntu machine with LTTng 2.2 installed (with titing tools 2.2 x) is required. Either create a VM machine yourself (e.g., on Virtualbox) or install it locally on your native Ubuntu (if correct version). Make sure that the root session daemon is running (sudo litting list-k) and have one UST process running (e.g. from lttng-tools git repository under tests/helio.cox).									
17.2	Configure Metadata channel (kernel)	1) Create and select session and click right mouse button 2) Select menu item Enable Channel. '3) Select Checkbox 'Configure metadata channel' 4) Update all text boxes 5) Click on 'Ok'	Verify after 3) that 'Channel Name' is set to metadata and the correspondig textbox is disabled. Verify after 5) that metadata channel was created under the kernel domain. Also verify in the properties view that all parameters are set correctly when selecting the channel metadata.	RCPTT	Pass						
17.3	Configure Metadata channel (UST)	1) Re-do 17.2 with a UST channel	Verify after 3) that 'Channel Name' is set to metadata and the correspondig textbox is disabled. Verify after 5) that metadata channel was created under the domain UST global. Also verify in the properties view that all parameters are set correctly when selecting the channel metadata.	RCPTT	Pass	Command is successful. However tracer doesn't create metadata channel. Bug in LTTng http://bugs.lttng.org/issues/994					
17.4	Configure File rotation (kernel)	1) Create and select session and click right mouse button 2) Select menu item 'Enable Channel' 3) Fill in channel name 4) Fill in 1048576 in 'Maximum size of trace files' and also 'Sub Buffer Size' 5) Fill in 2 in 'Maximum number of trace files' 6) Click on 'Ok' 7) Enable all kernel events 8) Start, wat and stop tracing.	After 8) verify on the trace node that trace files are not bigger than 1048576 bytes	RCPTT	Pass	Need a human to check the size on the host					
17.5	Configure File rotation (ust)	I Create and select session and click right mouse button 2) Select menu item "Enable Channel" 3) Fill in channel name 4) Select UST. 5) Fill in 262144 in "Maximum size of trace files' and also 'Sub Buffer Size' 6) Fill in 2 in "Maximum number of trace filesfiles' 7) Click on 'OK 8) Enable all UST events 9) Start, wait and stop tracing.	After 9) verify on the trace node that trace files are not bigger than 262144 bytes	RCPTT	Pass	Need a human to check the size on the host					
	Buffer Type - toggle UST/kernel	1) Create and select session and click right mouse button 2) Select menu item 'Enable Channel' 3) Select UST 4) Select Kernel 5) Slect cancel	Verify after 2 and 4 that the radio buttons for the buffer type is disabled and the buffer type "Global shared buffers" is selected which is the value for the kernel tracer. Verify after 3) that the radio buttons are enabled an no buffer type is selected	RCPTT	Pass						
17.7	Default UST Buffer Type	Create and select session and click right mouse button 2) Select menu item 'Enable Channel' 3) Select UST 4) Enter Channel Name 5) Select VSY	Verify after 5) that the default buffer type is configured for that channel (see properties view). Note for LTTng Tools 2.2 the default is per-PID and for LTTng Tools 2.3 and later it is per-UID	RCPTT	Pass						

		Prequisite: Multiple UST Applications need to run								
		Create and select session and click right mouse button								
		Select menu item 'Enable Channel'     Select UST								
		4) Select 'Per PID buffers'								
		5) Enter Channel Name 6) Select 'Ok'	Verify after 6) that the per-pid buffer type is configured for that channel (see							
		8) Enable all ust events	properties view). After 10) make sure							
17.8	per PID UST Buffer Type		that for each UST application one trace is created	RCPTT	Dane	9) and 10) not tested with RCPTT				
17.0	,,,	,	trace is created	KCFII	rass	9) and 10) not tested with RCP11				
		Prequisite: Multiple UST Applications need to run  1) Create and select session and click right mouse button								
		Select menu item 'Enable Channel'								
		3) Select UST 4) Select 'Per UID buffers'								
		5) Enter Channel Name	Verify after 6) that the per-pid buffer							
		Select 'Ok'     Enable all ust events	type is configured for that channel (see properties view). After 10) make sure			While doing this I found a few bugs but it ended up working. See				
17.9	per UID UST Buffer Type		that only one trace is created even multiple UST applications are running.	RCPTT	Pass	https://bugs.eclipse.org/bugs/show_bug.cgi?id=469425 and https: //bugs.eclipse.org/bugs/show_bug.cgi?id=469424 9) and 10) not tested with RCPTT				
17.5	Туре	10) Import sace	multiple 03 i applications are running.	KCFII	rass	9) and 10) not tested with RCP11				
	Snapshot Channel

TraceSynchronization

	Section	Pass	Fail		To Do	Comment			
	Trace Synchronization	13	0	0	0	0			
Target:									
Step	Test Case	Action	Verification			Comment			
0	Prerequisites								
0.1	Import traces	Import the scp_dest and scp_src traces in the synctraces.tar.gz file							
0.2	Create experiment 1	Create an experiment containing those 2 traces							
0.3	Create experiment 2	Create an experiment with any other trace							
1	View Management								
1.1	Open Synchronization View	Use menu Window → Show View → Tracing → Synchronization	Verify that 'Synchronization' view is shown	Manual	Pass				
1.2	Delete view	Close the Synchronization View	Synchronization' view is removed from perspective	Manual	Pass				
1.3	Open view	Use menu Window $\rightarrow$ Show View $\rightarrow$ Tracing $\rightarrow$ Synchronization	Synchronization' view is displayed and remains empty	Manual	Pass				
1.4	Open Experiment	Open the experiment containing the 2 synchronizable traces	Verify that the view is still empty	Manual	Pass				
1.5	Synchronize experiment	Right-click on the experiment and select 'Synchronize Traces'	After a time, the view is populated with synchronization result that say 'accurate'. And one of the original traces has been replace by a trace with the same name, but with an '_' at the end.	Manual	Pass				
1.6	Open view when trace is already loaded	Close Synchronization View     Load LTTng experiment     Open 'Synchronization' view	Verify that view is populated with synchronization data from currently opened experiment	Manual	Pass				
1.6.5	Synchronize experiment with constant offset	Try to offset a trace by a second	Visually verify that a synchronized trace is now offsetted	Manual	Pass		Simon: not sure wha Bernd: I think it is to	t of this operation	chronisation
1.7	Open trace	Open an Lttng Kernel trace	Synchronization view is empty	Manual	Pass			· · · · ·	
1.8	Re-open experiment	Open the experiment containing the 2 synchronized traces	View shows synchronization data from the experiment	Manual	Pass				
1.9	Restart	Restart Eclipse	Verify that view is populated with synchronization data from experiment	Manual	Pass				
2	Functionnalities								
2.1	Open experiment 2	Open the experiment containing traces that do not synchronize	Verify that the 'Synchronization' view is empty	Manual	Pass				
2.2	Go back to previous experiment	Re-open the experiment with the synchronizable traces	Verify that the 'Synchronization' view contains the data from the experiment	Manual	Pass				
2.3	Synchronize experiment	Right-click on the experiment and select 'Synchronize traces'	After the syncronization job finishes, the synchronized experiment is closed and experiment 2 is selected. The synchronization view is empty.	Manual	Pass				

4.3.0-TraceCompassTestCases LTTng 2.0 - Memory analysis

	Section	Pass	Fail	Туре	To Do	Comment	
	LTTng 2.0 - Memory Analysis	23	0	6	0	2	
Target:	Ubuntu 16.04 64 bit						
Step	Test Case	Action	Verification	Туре		Comment	
0	Prerequisites						
0.1	Download traces	Download UST trace with memory events from https://secretaire.dorsal.polymtl.ca/~gbastien/traces/eclipse_mem_ust.tar.gz. Hung: I suggest downloading eclipse trace					
0.2	Import trace with memory event	Import the LTTng UST trace downloaded above in Tracing project					
0.3	Import trace without memory event	Import one of the LTTng UST trace that does not contain the memory events, for example, the one used for the callstack view					
0.4	Import non-UST trace	Import one LTTng Kernel trace					
1	Project View						
	Check analysis can	open the trace that contains the memory events. In the project explorer, expand the					
1.1	execute	trace that contains the memory events	"Ust Memory" analysis is present and "normal"	SWTBot	Pass		84702
1.2	Verify help message when applicable	In the project explorer, open and expand the trace that contains the memory events, right-click the memory analysis and select Help	A generic help message appears with the name of the analysis.	Manual	Pass	Verified in Aug. 17-2018 at 15:09PM, but help message is not helpful	
1.3	Check analysis cannot execute	open the trace that contains the memory events. In the project explorer, expand the UST trace that does not contain memory events	"Ust Memory" analysis is present, but striked-out	Manual	Pass		84702
1.4	Verify help message when not applicable	In the project explorer, open and expand the UST trace that does not contain memory	The help message mentions the analysis is impossible to execute and contains the requirement that is not fulfilled	Manual	Pass		3.132
1.5	Check analysis for another trace type	In the project explorer, expand a LTTng Kernel trace	"Ust Memory" analysis is not present	SWTBot	Pass		84702
2	View Management	, i.e., i.e.	Co. monety analysis is not present	SWIBOU	- 455		04702
2.1	Populate analysis's view	Open the UST trace with memory events and expand the "UST Memory" analysis in the project explorer	"Ust Memory Usage" View appears under the analysis	SWTBot	Pass		
2.2	Open view	Double-click the UST Memory View under the memory analysis	The UST Memory Usage view opens and triggers the memory analysis. After the analysis, the XY chart is populated	SWTBot	Pass		
2.3	Close trace	Close the trace	The UST Memory Usage view is emptied.	Manual	Pass		
2.4	Open trace	With the view already opened, open the trace	The UST Memory Usage view is populated.	SWTBot	Pass		
2.5	Close view	Close the UST Memory Usage view	The view is closed.	Manual	Pass		
2.6	Re-open view	Double-click the UST Memory Usage view under the memory analysis in project explorer.	The view opens and is automatically populated.	Manual	Pass		
3	Mouse handling	5	T				
3.1	Drag move time range	Drag move xy chart left and right with middle button	Time range is dragged. When mouse button is released, the view refreshes with the new time range	Manual	Pass		

4.3.0-TraceCompassTestCases LTTng 2.0 - Memory analysis

3.2	Zoom time range (mouse wheel)	Zoom with CTL + mouse wheel up and down, cursor inside xy chart	Time range is zoomed in and out, relative to mouse cursor. When mouse wheel is stopped for a short time, series are updated and new time range is propagated to other views.	Manual	Pass	When you zoom in and a series was checked but it is now filtered out, when you zoom out you lose you checked series	
3.3	Drag select time range	Drag select time graph with right button	Selection highlighted. When mouse button is released, time range is zoomed to selection, series are updated and new time range is propagated to other views.	Manual	Pass		
3.4	Mouse hover	Hover mouse in xy chart anywhere	Tool tip shows values for each thread at the given timestamp	Manual	Pass		
3.5	Drag mouse selection	Drag select xy chart with left button	Selection highlighted. New selection is propagated to other views	Manual	Pass		
3.6	Shift key selection	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted. New selection is propagated to other views	Manual	Pass		
3.7	Drag mouse selection (Status bar)	Drag select xy chart with left button	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (draggged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass		
3.8	Shift key selection (Status bar)	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (draggged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass		
4	Synchronization						
	Preparation	Have the Histogram and UST Memory Usage views both visible		SWTBot	Pass		
4.1	Time synchronization	Select a random time in another view	Selected time line is updated.	Manual	Pass		
4.2	Time range synchronization	Select a new time range in UST Memory Usage view or in Histogram view.	Time range is updated.	Manual	Pass		
4.3	Time range selection synchronisation	In any other view that supports range synchronization, select a new range.	Selection range is highlighted.	Manual	Pass		

4.3.0-TraceCompassTestCases

Network Analysis

	Section	Pass	Fail		To Do	Comment
	Network Trace analysis	10	1	3	0	0
Targe	t: Ubuntu 14.04 64 bit					
Step	Test Case	Action	Verification			Comment
0	Prerequisites					
0.1	Import traces	Import the trace linked here				
1	Trace Import					
1.1	Open the Network Tracing perspective	In the project Explorer, expand any LTTng kernel trace	Verify that the events view, the properties and stream list are displayed	SWTBot	Pass	
1.2	Open trace	Double-click on the "TeamSpeak2.pcap" trace	The trace is given a "network" icon. When openned, the events view and histogram view is opened	SWTBot	Pass	In SWTBot other trace is used
2	View management					
2.1	Populate the views	Open the "TeamSpeak2.pcap"	The views are updated	SWTBot	Pass	
2.2	Look up stream	Open the Stream List view	One stream is available with endpoint A being 00:0c:29: 7c:ab:f9	Manual	Pass	
2.3	Close the trace	Close the trace	The stream list is emptied	Manual	Pass	
2.4	Close view	Close the Stream List view	The view is closed	Manual	Pass	
2.5	Open view when trace is already loaded	Re-open the trace. Open The Stream List view	The view opens with the correct title and is correctly populated.	Manual	Pass	
2.6	Open a non pcap trace	Close the trace	The stream list is emptied	Manual	Pass	
3	Stream List					
3.1	Re-open trace	Ensure only "TeamSpeak2.pcap" is opened	The trace is opened	Manual	Pass	
3.1	Create a filter from the stream list	Right click on stream 0, and select "Extract as Filter"	A filter named "FILTER stream eth 00:0c:29" is created	Manual	Pass	
3.2	Apply filter	In the events table, right click on an event and select "Apply preset filter-> stream eth 00:0c: 29"	24/24 events pass the filter	Manual	Fail	

4.3.0-TraceCompassTestCases XMLanalysis

	Section	Pass	Fail	Type	To Do	Comment
	XML analysis	42	0	0	0	35
Target:	Ubuntu 14.04 64 bit					
Step	Test Case	Action	Verification	Type		Comment
0	Prerequisites					
0.1	Import traces	Import LTTng kernel traces				
0.1	import traces	Download the test XML file here: https://secretaire.				
0.2	Get a test XML file	dorsal.polymtl.ca/~gbastien/Xml4Traces/Kernel.Linux.xml				
0.3	Make sure the XML file does not exists in the project	Open the Manage Xml Analyses menu and delete the XML file if it exists (or The XML files are located in <workspace directory="">/.metadata/.plugins/org.eclipse. tracecompass.tmf.analysis.xml.core/xml_files. Delete the linux kernel XML file if it exists.)</workspace>	NOTE: XML haven't files haven't been update to latest Kernel tracepoints and syscall changes. So, they only work with trace LTTng 2.5 and older			
1	XML file handling					
1.1	Verify analysis not present	In the project Explorer, expand any LTTng kernel trace	Verify that there is no 'Xml kernel State System' analysis	Manual	Pass	Verified in Aug. 17-2018 at 11:32AM
1.2	Import XML file	Right-click the Traces folder, select Manage XML analyses In the opened dialog import the Kernel. Linux.xml file and close the dialog.	Verify that the 'Xml kernel State System' analysis is now present under a LTTng kernel trace	Manual	Pass	Verified in Aug. 17-2018 at 11:33AM
1.3	Edit XML file	Right-click the Traces folder, select Manage XML analyses In the opened dialog, select Kernel.Linux and click Edit	Verify that the XML editor opens. The editor should have Design and Source sub-tabs	Manual	Pass	Verified in Aug. 17-2018 at 11:52AM
1.4	Disable XML file	Right-click the Traces folder, select Manage XML analyses In the opened dialog, click on the checkbox next to Kernel.Linux to disable it and click Apply.	Verify that the 'Xml kernel State System' analysis doesn't not exist under a LTTng kernel trace	Manual	Pass	Verified in Aug. 17-2018 at 13:50PM
1.5	Enable XML file	Right-click the Traces folder, select Manage XML analyses In the opened dialog, click on the checkbox next to Kernel Linux to enable it and click Apply.	Verify that the 'Xml kernel State System' analysis is present under a LTTng kernel trace	Manual	Pass	Verified in Dec. 18-2018 at 10:32AM
2	View management					
2.1	Populate the views	Open an LTTng kernel trace (eg trace2 from the tracecompass-test-traces repo)	The 'Xml kernel State System' analysis should have a + next to it, expand it and there should be 2 views under it: 'Xml Control Flow View' and 'Xml Resources View'	Manual	Pass	Verified in Aug. 17-2018 at 14:35PM
2.2	Open the 'Xml Control Flow View'	Double-click the 'Xml Control Flow View' under the analysis	A view titled 'Xml Control Flow View' should open and it should look quite similar to the Control Flow View	Manual	Pass	Verified in Aug. 17-2018 at 14:37PM
2.3	Open another XML view	Double-click the 'Xml Resources View' under the analysis	A view titled 'Xml Resources View' should open and it should look quite similar to the Resources view's CPU entries. Both XML views are opened.	Manual	Pass	Verified in Aug. 17-2018 at 14:37PM
2.3	Close view	Close both XML view	The view are closed	Manual	Pass	
4.7	Open view when trace is	Close both Aivil view	THE VIEW AIC CHOSEN	iviailuai	1 455	Verified in Aug. 17-2018 at 14:39PM
2.5	already loaded	Double-click one of the views under the analysis	The view opens with the correct title and is correctly populated.	Manual	Pass	Verified in Aug. 17-2018 at 14:40PM
2.6	Close traces	Close all opened traces	The view is emptied.	Manual	Pass	Verified in Aug. 17-2018 at 14:02PM
2.7	Open trace	Open an LTTng Kernel trace	The view is populated	Manual	Pass	Verified in Aug. 17-2018 at 14:03PM
2.8	Open another trace	Open a non-LTTng Kernel trace	The view is emptied.	Manual	Pass	Verified in Aug. 17-2018 at 14:04PM
2.9	Open LTTng Kernel trace	Open an LTTng Kernel trace	The view is populated.	Manual	Pass	Verified in Aug. 17-2018 at 14:04PM
3	View selection	·				
3.1	Select an entry in the table	Select an entry in the table	Same entry is highlighted in time graph.	Manual	Pass	Verified in Aug. 17-2018 at 14:43PM
3.1	Select entry in time graph	Select an entry in the time graph (empty region)	Same entry is highlighted in table. Selected time line is updated. Other views are synchronized to selected time.	Manual	Pass	Verified in Aug. 17-2018 at 14:43PM

4.3.0-TraceCompassTestCases XMLanalysis

2.3	Select state in time graph	Select a state in the time graph	Same entry is highlighted in table. State is highlighted in time graph. Selected time line is updated. Other views are synchronized to selected time.	Manual	Pass	Verified in Aug. 17-2018 at 14:43PM
4	Mouse handling	5 1	•			
4.1	Drag move time range	Drag move time graph left and right with middle button	Time range is dragged. When mouse button is released, states are updated and new time range is propagated to other views.	Manual	Pass	Verified in Aug. 17-2018 at 14:47PM
4.2	Zoom time range (mouse wheel)	Zoom with CTRL + mouse wheel up and down, cursor inside time graph	Time range is zoomed in and out, relative to mouse cursor. When mouse wheel is stopped for a short time, states are updated and new time range is propagated to other views.	Manual	Pass	Verified in Aug. 17-2018 at 14:48PM
4.3	Zoom time range (mouse drag)			Manual	Pass	Verified in Aug. 17-2018 at 14:48PM
4.4	Mouse vertical scroll	Scroll with mouse wheel up and down, cursor outside time graph	Table and time graph scroll up and down and remain aligned. Selected entry does not change. Vertical scroll bar updated.	Manual	Pass	Verified in Aug. 17-2018 at 14:48PM
4.5	Vertical scroll bar	Click and drag vertical scroll bar	Table and time graph scroll up and down and remain aligned. Selected entry does not change.	Manual	Pass	Verified in Aug. 17-2018 at 14:48PM
4.6	Drag select time range	Drag select time graph with right button	Selection highlighted. When mouse button is released, time range is zoomed to selection, states are updated and new time range is propagated to other views.	Manual	Pass	Verified in Aug. 17-2018 at 14:49PM
4.7	Double-click reset time range	Double-click left button on time scale	Time range is reset to full range, states are updated and new time range is propagated to other views.	Manual	Pass	Verified in Aug. 17-2018 at 14:50PM
4.8	Mouse hover (empty region)	Hover mouse in time graph over empty region	Tool tip shows entry name only.	Manual	Pass	Verified in Aug. 17-2018 at 14:50PM
4.9	Mouse hover (state)	Hover mouse in time graph over state	Tool tip shows entry name, state name, date, start time, end time, duration.	Manual	Pass	Verified in Aug. 17-2018 at 14:51PM
4.10	Drag mouse selection	Drag select time graph with left button	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (draggged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass	Verified in Aug. 17-2018 at 14:51PM
4.11	Shift key selection	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (draggged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass	Verified in Aug. 17-2018 at 14:51PM
5	Keyboard handling					
5.1	Keyboard navigation in table (entry selection)	With focus on table, use UP, DOWN, HOME, END keys	Selected process is changed. Time graph selection is updated.  Vertical scroll bar updated.	Manual	Pass	Verified in Aug. 17-2018 at 14:52PM

4.3.0-TraceCompassTestCases XMLanalysis

5.2	Keyboard navigation in table (tree expansion)	in Linux use press ENTER while parent or child process is selected	item expansion is updated. Vertical scroll bar updated. For child process, left changes selection to parent, time graph selection is updated. Vertical scroll bar updated.	Manual	Pass	Verified in Aug. 17-2018 at 14:52PM
5.4	Keyboard navigation in time graph (process selection)	With focus on time graph, use UP, DOWN, HOME, END keys	Selected process is changed. Table selection is updated. Vertical scroll bar updated.	Manual	Pass	Verified in Aug. 17-2018 at 14:52PM
5.4	Keyboard navigation in time graph (state selection)	With focus on time graph, use LEFT, RIGHT keys	Previous or next state is selected. Selected time is updated in other views.	Manual	Pass	Verified in Aug. 17-2018 at 14:53PM
6	Tool bar handling					
6.1	Show Legend	Click Show Legend button	The legend dialog is opened and can be closed.	Manual	Pass	Verified in Aug. 17-2018 at 14:55PM
6.2	Reset Time Scale	Click Reset Time Scale button	Time range is reset to full range, states are updated and new time range is propagated to other views.	Manual	Pass	Verified in Aug. 17-2018 at 14:55PM
6.3	Select Previous/Next Event	Click Previous/Next Event button	Previous or next state is selected. Selected time is updated in other views.	Manual	Pass	Verified in Aug. 17-2018 at 14:55PM
6.4	Select Previous/Next Process	Click Previous/Next interval button	Selected interval (process/resource) is changed in table and time graph. Vertical scroll bar updated.	Manual	Pass	Verified in Aug. 17-2018 at 14:56PM
6.5	Zoom In/Out	Click Zoom In/Out button	Time range is zoomed in and out, relative to center of time range. States are updated and new time range is propagated to other views.	Manual	Pass	Verified in Aug. 17-2018 at 14:56PM
6.6	Filter Dialog	Open Filter Dialog	Verify that all buttons are working correctly	Manual	Pass	Verified in Aug. 17-2018 at 14:56PM
6.7	Filter Processes	Open Filter Dialog     Deselect several processes     Press Ok	Verify that only selected entries are displayed in the view	Manual	Pass	Verified in Aug. 17-2018 at 14:57PM
7	Synchronization					
7.1	Time synchronization	Select a random time in another view	Selected time line is updated. If selected time is outside current range, time range is updated to include it.	Manual	Pass	Verified in Aug. 17-2018 at 14:57PM
7.2	Time range synchronization	Select a new time range in Resources view or in Histogram view.	Time range is updated.	Manual	Pass	Verified in Aug. 17-2018 at 14:57PM
7.3	Time range selection synchronisation	In any other view that supports range synchronization, select a new range.	Selection is highlighted. If begin time (T1) of selected time range is outside the current range, then time range is updated to include it	Manual	Pass	Verified in Aug. 17-2018 at 14:59PM

	Section	Pass	Fail		To Do	Comment
	Critical path	45	0	2	0	0
Target:						
Step	Test Case	Action	Verification			Comment
0	Prerequisites					
0.1	Import traces	Import the 3 django traces from the test traces				
0.2	Create experiment	Create an experiment with the 3 traces in it				
0.3	Synchronize experiment	Synchronize the experiment, it should be accurate and 2 of the traces will be udpated				
1	View management					
1.1	Open trace	Open any of the django traces in Project Explorer	Expand the Views element under the trace. The OS Exec Graph analysis is there and "normal". The Critical Path analysis is there and the Critical Flow view is available under it.	Manual	Pass	Verified in Aug. 17- 2018 at 10:33AM
1.2	Open experiment	Open the django experiment in Project Explorer	Expand the Views element under the trace. The LTTng Kernel Exec Graph analysis is there and "normal". The Critical Path analysis is there and the Critical Flow view is available under it.	Manual	Pass	
1.3	Open view	Expand the Views element, then the Critical Path analysis and click on the Critical Flow View	Critical Path view is opened and empty	SWTBot	Pass	
1.4	Close view	Close the Critical Flow View	Critical Path view is closed	Manual	Pass	

1.5	Unapplicable trace	Open a trace that is not a LTTng kernel trace Open an	Expand the Views element under the trace. The LTTng Kernel Exec Graph analysis is not there. The Critical Path analysis is there and the Critical Flow view is available under it.  Expand the Views element under the trace.	Manual	Pass	
1.6	Unapplicable experiment	experiment that does not contain LTTng kernel traces	The LTTng Kernel Exec Graph analysis is there, but striked out. The Critical Path analysis is there and the Critical Flow view is available under it.	Manual	Pass	
2	View population					
2.1	Populate the view with trace	With the django- client trace and the critical path view opened, in the control flow view, find the process named python (TID 9496). Right-click on the process and select "Follow python/9496"	The LTTng kernel exec graph is executed and at the end, the critical path view shows the interaction between 3 workers.	SWTBot	Pass	
2.2	Select worker in time graph	Select an empty region in the time graph section	Same process is highlighted in table. Selected time line is updated. Other views are synchronized to selected time.	Manual	Pass	
2.3	Select state in time graph	Select a state in the time graph	Same process is highlighted in table. State is highlighted in time graph. Selected time line is updated. Other views are synchronized to selected time.	Manual	Pass	
2.4	Select worker in tree viewer	Select a worker from the tree viewer section	Same process is highlighted in time graph.	Manual	Pass	
2.5	Populate the view with empty path	Repeat steps of 2.1, with django- client trace and process lttng- sessiond (TID 9355)	The Critical Path View is emptied	Manual	Pass	

2.5.5	Select again	Repeat steps of 2.1, and select python/9496 again	The critical path should be the same as 2.1	Manual	Pass	
2.6	Re-opening	Close the django- client trace, reopen it and	The Critical Path View should be populated like in step 2.1	Manual	Pass	
2.7	Populate the view with experiment	Repeat steps of 2.1, but with the django-experiment instead	The LTTng kernel exec graph is executed and at the end, the critical path view is populated with elements from the 3 traces.	Manual	Pass	
2.8	Populate with trace with time selection	Re-open django- client trace. In the Control Flow View, select a time after the python process exited, then follow the python/9496 process	The Critical Path View should be populated like in step 2.1	Manual	Pass	
3	Mouse handling					
		Ctrl-Drag move time graph left and	Time range is dragged. When mouse button is released, states are updated and new			
3.1	Drag move time range	right with middle button	time range is propagated to other views.	Manual	Pass	
3.1			· ·	Manual Manual	Pass Pass	
	zoom time range	button  Zoom with mouse wheel up and down, cursor inside time graph while holding the Ctl button  Drag in time graph	time range is propagated to other views.  Time range is zoomed in and out, relative to mouse cursor. When mouse wheel is stopped for a short time, states are updated and new time range is propagated to other			

3.5	Vertical scroll bar	Click and drag vertical scroll bar	Table and time graph scroll up and down and remain aligned. Selected process does not change.	Manual	Pass	
3.6	Drag select time range	Drag select time graph with right button	Selection highlighted. When mouse button is released, time range is zoomed to selection, states are updated and new time range is propagated to other views.	Manual	Pass	
3.7	Double-click reset time range	Double-click left button on time scale	Time range is reset to full range, states are updated and new time range is propagated to other views.	Manual	Pass	
3.8	Mouse hover (empty region)	Hover mouse in time graph over empty region	Tool tip shows process name and PID.	Manual	Pass	
3.9	Mouse hover (state)	Hover mouse in time graph over state	Tool tip shows worker name, state name, priority, date, start time, end time, duration.	Manual	Pass	
3.10	Drag mouse selection	Drag select time graph with left button	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass	
3.11	Shift key selection	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass	
4	Keyboard handling	'				
4.1	Keyboard navigation in table (process selection)	With focus on table, use UP, DOWN, HOME, END keys	Selected process is changed. Time graph selection is updated. Vertical scroll bar updated.	Manual	Pass	
		With focus on table, in Windows use LEFT, RIGHT keys while trace or worker is selected				
4.2	Keyboard navigation in table (tree expansion)	in Linux use SHIFT LEFT, RIGHT keys while trace or worker is selected	For trace, tree is expanded or collapsed. Time graph item expansion is updated. Vertical scroll bar updated. For workers, it does nothing.	Manual	Pass	

4.3	Keyboard navigation in time graph (process selection)	With focus on time graph, use UP, DOWN, HOME, END keys	Selected worker is changed. Table selection is updated. Vertical scroll bar updated.	Manual	Pass	
4.4	Keyboard navigation in time graph (state selection)	With focus on time graph, use LEFT, RIGHT keys	Previous or next state is selected. Selected time is updated in other views.	Manual	Pass	
5	Tool bar handling					
5.1	Align views	Click on the Align View Button, with another time graph view, eg the Control Flow view opened above or under	When it is pressed, moving the line between tree viewer and time graph will move the line of the other view. If not pressed, the line can be moved without affecting the other views	Manual	Pass	
5.2	Show Legend	Click Show Legend button	The legend dialog is opened and can be closed.	Manual	Pass	
5.3	Reset Time Scale	Click Reset Time Scale button	Time range is reset to full range, states are updated and new time range is propagated to other views.	Manual	Pass	
5.4	Select Previous/Next Event	Click Previous/Next Event button	Previous or next state is selected. Selected time is updated in other views.	Manual	Pass	
5.5	Select Previous/Next Element	Click Previous/Next Element button	Selected worker is changed in table and time graph. Vertical scroll bar updated.	Manual	Pass	
5.6	Zoom In/Out	Click Zoom In/Out button	Time range is zoomed in and out, relative to center of selection or window. States are updated and new time range is propagated to other views.	Manual	Pass	
5.7	Add Bookmark	Select a time, and click on the Add Bookmark button	The bookmark is added and is displayed in the other views as well (if enabled)	Manual	Pass	
5.8	Next/Previous marker	Add more bookmarks, then click on the next/previous marker buttons	The time graph view navigate between the bookmarks, States are updated and time selection is propagated to other views. When on a bookmark, the Add bookmark buttons changes to Delete bookmark	Manual	Pass	
5.9	Delete bookmark	With next/previous marker, when on a bookmark, click the delete bookmark button	The bookmark is deleted from all views	Manual	Pass	

5.11	Do not show markers	Click on the down arrow at the extreme right of the view, then expand Show markers and uncheck the Bookmarks box	All remaining bookmarks disappear from the view, but remain in other views where the they are enabled	Manual	Pass	
5.12	Show markers	Same as above, recheck the Bookmarks box	The bookmarks come back	Manual	Pass	
6	Synchronization					
6.1	Time synchronization	Select a random time in another view	Selected time line is updated. If selected time is outside current range, time range is updated to include it.	Manual	Pass	
6.2	Window range synchronization	Select a new window range in another view	Window range is updated.	Manual	Pass	
6.3	Selection range synchronization	In any other view that supports selection range synchronization, select a new range.	Selection is highlighted. If the left time (T1) of selected time range is outside the current range, then window range is updated to include it	Manual	Pass	
6.4	Out of region selection		Selected time is updated and the critical path view is synced with the other	Manual	Pass	

4.3.0-TraceCompassTestCases

	Section	Pass	Fail		To Do	Comment
	LAMI	18	0	0	0	0
Target:	Ubuntu 16.04 64					
Step	Test Case	Action	Verification			Comment
0	Prerequisites					
0.1	Import traces	any trace since we use stub for the result				
	Download analysis	https://bugs.eclipse.org/bugs/attachment.cgi?id=263946 from bug: https://bugs.eclipse.org/bugs/show_bug.cgi?				
0.2	stubs	id=493941				
	Custom external					
1	analysis					
-		Create the following analysis (\$name, \$command):	All new external analysis are present under the "External			
		analysisEmpty, analysisEmpty	Analysis" node in the Project explorer view. All new elements do NOT have the strikethrough text			
		analysisMultipleRow, analysisMultipleRow	style applied			
		analysisMultipleSimilarRow, analysisMultipleSimilarRow analysisOneRow, analysisOneRow	EXCEPT for the tuple (invalidAnalysis, invalidAnalysis)			
		multipleReports, multipleReports				
		invalidAnalysis, invalidAnalysis				
		errorResult, errorResult clone, analysisOneRow				
		Right click on "External Analyses" node Click the "add" action				
		Insert \$name				
		Insert "fullpath/\$executable" which is the full path to the stub executable.				
		ex:"/tmp/stub/stubAnalysis" where stubAnalysis is the stub				
	Add all stubs	executable The path do NOT support ~ or relative path				
1.1	analysis	The pain do No 1 support of foldave pain		Manual	Pass	
1.2	Actions availables	Right click on a non-strikethrough custom analysis.	The run action can be clicked and in enabled text mode.	Manual	Pass	
	Actions avaliables	Right click on a strikethrough custom analysis.	The run action CANNOT be clicked and is in disabled text	Manual	Pass	
1.3	Delete analysis	Right click on the tuple (clone, invalidAnalysis) Select the delete action for the node	The analysis does not appear in the list anymore.	Manual	Pass	
1.0	Delete unarysis	ocide the delete determine the mode	analysisEmpty should return a message to the user regard			
1.4	Run analysis	Launch remaining analysis via righ-click and run action	errorResult should return an error message to the user and All other one have result and should result in a new table a	d display the result	Pass	
2	Reports	Laurich Ternaining analysis via right-click and full action	All other one have result and should result in a new table a	ind new report node	r a55	
	Reports		The "Reports" node under the Project Explorer should contain			
			4 report:			
			analysisMultipleRow Report analysisMultipleSimilarRow Report			
			analysisOneRow Report		D	
2.1	Reports node	Expand the "Reports" node under the Project Explorer	multipleReports	Manual	Pass	
			An additional node should be present under the "Reports" node:			
			analysisOneRow Report #2			
			Note: This behaviour is subject to change in the following			
			year but still an action will be taken on same name report	Marriel	Desa	
2.2	Same name report	Execute the "analysisOneRow" analysis again.	creation.	Manual	Pass	
2.3	Delete node	Right click on the duplicate "analysis OneRow" node and click on the delete action	The node reports is not present anymore	Manual	Pass	
	_		A new panel should open with the result table of the		D	
2.4	Open a report	Right click on any report and select the "open" action	analysis	Manual	Pass	
2.5	Open the same report again	Right click again on the same report to open it	A new panel should open with the result table of the analysis	Manual	Pass	
2 -			Validate that a user is able to navigate between sub tab	Morriel	Desa	
2.6	Multiple report	Open the "multipleReports" report.	of a report	Manual	Pass	
3	Result Table			NA	D.	
3.1	Prerequisites	Open the "analysisMultipleRowReport"		Manual	Pass	
3.2	Hide table	Click the "Toggle" button in the right corner of the result table	The result table is hidden	Manual	Pass	
3.3	Show table	Click the "Toggle" button in the right corner of the result table	The result table is shown	Manual	Pass	

4.3.0-TraceCompassTestCases

3.4	Sorting	Sort all column by clicking on the column name. Clicking multiple time on the name should change the ordering sorter.	Validate that the order make sense	Manual	Pass	
3.5	Colum Resizing	Resize the column	Validate that the resize works	Manual	Pass	
3.6	Multiple selection	Select multiple rows by holding ctrl and clicking on multiple unselected rows of the table	Multiple selections are highlighted in the table	Manual	Pass	
3.7	Unselect selection	Deselect multiple rows by holding ctrl and clicking on multiple selected rows of the table	The clicked row should not be selected anymore	Manual	Pass	
4	Bar Chart					
4.1	Create	Use the menu on the upper right of the result table and select "create bar chart"	Note: a bar chart does NOT perform agregation of categories values			
4.2	Series dialog add	Select any x and any y click add	Series are added to the series list	Manual	Pass	
4.3	Series dialog remove	Remove all newly created series via the delete button	User should be able to delete series	Manual	Pass	
4.4	Creat chart	Select any x and y and click add and "ok"	A bar chart should be created Note: a bar chart does NOT perform agregation of categories values	Manual	Pass	
4.5	Selection	Click on any bar inside the chart	The corresponding row should be selected in the table and the chart should highlight the selected bar	Manual	Pass	
4.6	Multi selection	Ctrl+click on other unselected bar	Selections should be highlighted in the result table and the chart	Manual	Pass	
4.7	Deselection	Ctrl+click on other selected bar	The clicked bar should be removed from selection and the result table update with the current selections	Manual	Pass	
4.8	Y axis	Recreate the same graph but with the y log scale option enabled	Y axis should be in log scale mode  Note: check for zero value and negative handling since log scale do not support zero and negative	Manual	Pass	
4.9	Keep the chart open	Keep the chart open		Manual	Pass	
4.10	Hide the table results	Hide the table results		Manual	Pass	
5	Scatter Chart					
5.1	Create	Use the menu on the upper right of the result table and select "create scatter chart"				
5.2	Creat chart	Select any x and y and click add and "ok"	A scatter chart should be created	Manual	Pass	
5.3	Selection	Should be the same behaviour as the bar chart	Should be the same behaviour as the bar chart	Manual	Pass	
5.4	Multi selection	Should be the same behaviour as the bar chart	Should be the same behaviour as the bar chart	Manual	Pass	
5.5	Deselection	Should be the same behaviour as the bar chart	Should be the same behaviour as the bar chart	Manual	Pass	
5.6	Mouse hovering	Hover mouse in the graph	On mouse hovering a cross should snap to the nearest point	Manual	Pass	
5.7	Full deselection	Click in the chart when no hovering cross is present	All selected objects should be deselected	Manual	Pass

	LTTng 2.0 - I/O Analysis	21	0	5	0	1
Target:	Ubuntu 16.04 64 b					
Step	Test Case	Action	Verification	Type		Comment
0	Prerequisites					
0.1	Import traces	Import LTTng Kernel traces in Tracing project				
1	Project View					
1.1	Check analysis can execute	In the project explorer, expand a LTTng Kernel trace	"Input/Output" analysis is present and "normal" (not striked-out)	SWTBot	Pass	
1.2	Verify help message when applicable	In the project explorer, open and expand the LTTng kernel trace, right-click the Input/Output analysis and select Help	A generic help message appears with the name of the analysis	Manual	Pass	
1.5	Check analysis for another trace type	In the project explorer, expand a non- LTTng Kernel trace	"Input/Output" analysis is not present	SWTBot	Pass	
2	View Management					

2.1	Populate analysis's view	Open an LTTng kernel trace and expand the "Input/Output" analysis in the project explorer	"Disk I/O Activity" View appears under the analysis	SWTBot	Pass	
2.2	Open view	Double-click the Disk I/O Activity View under the Input/Output analysis	The Disk I/O Activity view opens and triggers the input/output analysis. After the analysis, the xy charts is populated.	SWTBot	Pass	
2.3	Close trace	Close the trace	The Disk I/O Activity view is emptied.	Manual	Pass	
2.4	Open trace	With the view already opened, open the trace	The Disk I/O Activity view is populated.	Manual	Pass	
2.5	Close view	Close the Disk I/O Activity view	The view is closed.	Manual	Pass	
2.6	Re-open view	Double-click the Disk I/O Activity view under the Input/Output analysis in project explorer.	The view opens and is automatically populated.	Manual	Pass	
3	View selection					
4	Mouse handling					

4.1	Drag move time range	Drag move xy chart left and right with middle button	Time range is dragged. When mouse button is released, series are updated and new time range is propagated to other views.	Manual	Pass	
4.2	Zoom time range (mouse wheel)	Zoom with mouse wheel up and down, cursor inside xy chart	Time range is zoomed in and out, relative to mouse cursor. When mouse wheel is stopped for a short time, series are updated and new time range is propagated to other views.	SWTBot	Pass	
4.3	Drag zoom time range	Drag select time graph with right button in xy chart	Selection highlighted. When mouse button is released, time range is zoomed to selection, series are updated and new time range is propagated to other views.	Manual	Pass	

4.4	Mouse hover	Hover mouse in xy chart region anywhere	Tool tip shows the puntual disk activity, with units in <unit>/s</unit>	Manual	Pass	
4.5	Drag mouse selection	Drag select xy chart with left button	Selection highlighted and selection range is propagated to other views	Manual	Pass	
4.6	Shift key selection	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted and selection rang is propagated to other views	Manual	Pass	

4.70	Drag mouse selection	Drag select xy chart with left	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (draggged) selected time and delta the time difference between T2-T1 (can be	Manual	Pass	
4.70	(Status bar)	button	negative)	Manuai	Pass	

4.8	Shift key selection (Status bar)	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (draggged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass	Christophe: when selecting a range with shift, T2 is always greater than T1. When you left click somewhere, it becomes T1, but if you shift+left click on a lower time (to the left), that second one becomes T1 and the former T1 becomes T2. Thus, T2-T1 can never be negative.
5	Keyboard handling					
<b>6</b> .1	Time synchronization	Select a random time in another view	Selected time line is updated. If selected time is outside current range, time range is updated to include it.	Manual	Pass	

6.2	Time range synchronization	Select a new time range in Disk I/O Activity view or in Histogram view.	Time range is updated.	Manual	Pass	
6.3	Time range selection synchronisation	In any other view that supports range synchronization, select a new range.	Selection is highlighted. If the most left time (T1) of selected time range is outside the current range, then time range is updated to include it	Manual	Pass

3.3	Zoom time range (mouse drag)	Drag in time graph scale left and right with left button	Time range is zoomed in and out. When mouse button is released, states are updated and new time range is propagated to other views.	Manual	Pass		
3.4	Mouse vertical scroll	Scroll with mouse wheel up and down, cursor outside time graph	Table and time graph scroll up and down and remain aligned. Selected worker does not change. Vertical scroll bar updated.	Manual	Pass		
3.5	Vertical scroll bar	Click and drag vertical scroll bar	Table and time graph scroll up and down and remain aligned. Selected process does not change.	Manual	Pass		
3.6	Drag select time range	Drag select time graph with right button	Selection highlighted. When mouse button is released, time range is zoomed to selection, states are updated and new time range is propagated to other views.	Manual	Pass		
3.7	Double-click reset time range	button on time	Time range is reset to full range, states are updated and new time range is propagated to other views.	Manual	Pass		
3.8	Mouse hover (empty region)	Hover mouse in time graph over empty region	Tool tip shows process name only.	Manual	Pass		

3.9	Mouse hover (state)	Hover mouse in time graph over state	Tool tip shows entry name, state name, date, start time, end time, duration.	Manual	Pass		
3.10	Drag mouse selection	Drag select time graph with left button	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass		
3.11	Shift key selection	Click select with left button (begin time), press shift key and click select another time (end time)	Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be negative)	Manual	Pass		
4	Keyboard handling						
4.1	Keyboard navigation in table (process selection)	With focus on table, use UP, DOWN, HOME, END keys	Selected entry is changed. Time graph selection is updated. Vertical scroll bar updated.	Manual	Pass		
4.2	Keyboard navigation in table (tree expansion)	With focus on table, in Windows use LEFT, RIGHT keys while expandable element is selected in Linux use SHIFT LEFT, RIGHT keys while expandable element is selected	For expandable element, tree is expanded or collapsed. Time graph item expansion is updated. Vertical scroll bar updated. For other entries, it does nothing.	Manual	Pass		
4.3	Keyboard navigation in time graph (process selection)	With focus on time graph, use UP, DOWN, HOME, END keys	Selected entry is changed. Table selection is updated. Vertical scroll bar updated.	Manual	Pass		

4.4	Keyboard navigation in time graph (state selection)	With focus on time graph, use LEFT, RIGHT keys	Previous or next state is selected. Selected time is updated in other views.	Manual	Pass			
5	handling							
5.1	Align views	Click on the Align View Button, with another time graph view, eg the Control Flow view opened above or under	When it is pressed, moving the line between tree viewer and time graph will move the line of the other view. If not pressed, the line can be moved without affecting the other views	Manual	Pass			
5.2	Show Legend	Click Show Legend button	The legend dialog is opened and can be closed.	Manual	Pass			
5.3	Reset Time Scale	Click Reset Time Scale button	Time range is reset to full range, states are updated and new time range is propagated to other views.	Manual	Pass	Verified in Aug. 15- 2018 at 16:27PM		
5.4	Select Previous/Next Event	Click Previous/Next Event button	Previous or next state is selected. Selected time is updated in other views.	Manual	Pass	State works		
5.5	Select Previous/Next Element	Click Previous/Next Element button	Selected entry is changed in table and time graph. Vertical scroll bar updated.	Manual	Pass			

			Time range is zoomed in and out, relative to center of selection or window. States are updated and new time range				
5.6	Zoom In/Out	Click Zoom In/Out button	is propagated to other views.	Manual	Pass		
5.7	Add Bookmark	Select a time, and click on the Add Bookmark button	The bookmark is added and is displayed in the other views as well (if enabled)	Manual	Pass		
5.8	Next/Previous marker	Add more bookmarks, then click on the next/previous marker buttons	The time graph view navigate between the bookmarks, States are updated and time selection is propagated to other views. When on a bookmark, the Add bookmark buttons changes to Delete bookmark	Manual	Pass		
5.9	Delete bookmark	With next/previous marker, when on a bookmark, click the delete bookmark button	The bookmark is deleted from all views	Manual	Pass		
5.11	Do not show markers	Click on the down arrow at the extreme right of the view, then expand Show markers and uncheck the Bookmarks box	All remaining bookmarks disappear from the view, but remain in other views where the they are enabled	Manual	Pass		
5.12	Show markers	Same as above, recheck the Bookmarks box	The bookmarks come back	Manual	Pass		
6	Synchronization	1					
6.1	Time synchronization	Select a random time in another view	Selected time line is updated. If selected time is outside current range, time range is updated to include it.	Manual	Pass		
6.2	Window range synchronization	Select a new window range in another view	Window range	Manual	Pass		

		view that supports selection range	Selection is highlighted. If the left time (T1) of selected time range is outside the current range, then window range is				
	Selection range		updated to				
6.3	synchronization		include it	Manual	Pass		

	Section	Pass	Fail		To Do	Comment
	Flame Graph	19	0	11	0	0
Target:	Windows 7 64 bit					
Step	Test Case	Action	Verification			Comment
<u>0</u>	<b>Download the test resources</b>	<b>Download this</b>				
1	Preparation					
1.1	Open TMF Flame Graph View	Use menu Window → Show View → Tracing → Flame Graph	Verify that 'Flame Graph View' view is shown	SWTBot	Pass	
1.2	Import generic trace	Import a trace that does not have any call stack information, like a standard kernel trace	Verify that nothing is shown in the view	SWTBot	Pass	
1.3	Import cyg-profile trace	Import the trace in the "trace" directory of the downloaded zip	Verify that the Flame Graph View is populated with some callers/callees information.	SWTBot	Pass	
1.4	Import cyg-profile-fast trace	Import a trace in the "trace-fast" directory of the downloaded zip	Verify that the Flame Graph View is populated with some callers/callees information.	SWTBot	Pass	
2	Managa Vian					
2	Manage View		Elama Carabi			
2.1	Close view	Close the 'Flame Graph' View	Flame Graph' view is removed from perspective	SWTBot	Pass	

2.2	Open view	Use menu Window → Show View → Other → Tracing → Flame Graph	Flame Graph' view is displayed and re-populated	SWTBot	Pass	
2.3	Open Trace	Open "trace(-fast)" trace	Verify that view is populated with callers/callees information	SWTBot	Pass	
2.4	Open view when trace is already loaded	1) Close 'Flame Graph' view 2) Open "glxgears-cyg- profile(-fast)" trace located in the git in ctf test 3) Open 'Flame Graph' view	Verify that view is populated with callers/callees information	SWTBot	Pass	
2.5	Open Experiment	Open Experiment with 2 or moreFlame Graph traces. (You can use both traces)	is populated with all callers/callees information	Manual	Pass	
2.6	Restart	Restart Eclipse with Flame Graph trace opened	Verify that view is populated with callers/callees from trace	Manual	Pass	
2.7	Close all traces	Close traces and experiment one by one from the editor tab	Verify that Flame Graph view is cleared after closing the last trace	Manual	Pass	
3	Sorting					

3.1	Thread name sorting	Open a trace multiple Flame Graph thread or open experiment with 2 or moreFlame Graph traces. Then select 'Sort threads by thread name'	The view is sorted by thread name.	Manual	Pass	
3.2	Thead id sorting	Open a trace multiple Flame Graph thread or open experiment with 2 or moreFlame Graph traces. Then select 'Sort threads by thread id'	The view is sorted by thread id.	Manual	Pass	
4	Synchronization					
4.1	Time synchronization	Select a random time in another view	Selected time line is not updating. Nothing happen.	Manual	Pass	
4.2	Go to maximum	1. Open the 'Call Stack' View 2. In the 'Flame Graph' view, right-click on a random entry in the graph 3. Select 'go to maximum'	- The 'Call Stack' view is populated - The call stack view is synchronised to the range of the maximum call duration of the 'Flame Graph' selected entry	Manual	Pass	

4.3	Go to minimum	1. Open the 'Call Stack' View 2. In the 'Flame Graph' view, right-click on a random entry in the graph 3. Select 'go to minimum'	- The 'Call Stack' view is populated - The call stack view is synchronised to the range of the minimum call duration of the 'Flame Graph' selected entry	Manual	Pass	
5	Function name import					
5.1	Function name import	1. Open the 'Call Stack' view with the 'Flame Graph' view and the cygprofile trace opened 2. Import 'cygprofile-mapping. txt' as mapping text file	Both 'Call Stack' and 'Flame Graph' views display function name instead of function address.	SWTBot	Pass	
5	Mouse handling					
5.1	Mouse hover (empty region)	Hover mouse in time graph over empty region	Tool tip shows depth only	SWTBot	Pass	
	Mouse hover (state)	Hover mouse in time graph over state		SWTBot	Pass	

4.3.0-TraceCompassTestCases CountersView

#	Section	Pass	Fail		To Do	Comment
	Counters View	3	0	0	0	0
Target:						
Step	Test Case	Action	Verification			Comment
1	Preparation					
1.1	Import an LTTng trace (with counters) and non LTTng traces LTTng trace (with counters): kernel VM in test-traces		In the project explorer, ensure the Counters view icon is only strikethroughed for the non LTTng trace.  Manual		Pass	
2	Filtered checkbox tree					
2.1	Same as 1.1	Same as above	The color is changed when filtering the counters	Manual	Pass	
3	Displaying counters data					
3.1	Same as 1.1	Same as above	All counters are displayed	Manual	Pass	
4	Supporting experiments					
4.1	Same as 1.1	Same as above	All counters are displayed	Manual	Pass	
5	Persistence between traces					
5.1				Manual	N/A
