 - relevant bits in our CI code that launches cluster installation and test updated to know about new distribution (centos, sles, and now **leap**)
 - can boot Leap 15.1 sms node through Jenkins:

```
sms003:~ # cat /etc/os-release
NAME="openSUSE Leap"
VERSION="15.1 "
ID="opensuse-leap"
ID_LIKE="suse opensuse"

CentOS8 Tracking

- Have been watching CentOS8 progress via public page at https://wiki.centos.org/About/Building_8
 - lot of progress has been made
 - but, work is currently on **hold** while working on centos 7.7 (see this [thread](#))
 - so, we can expect 7.7 update prior to first centos8 release
- Assuming 7.7 comes out soon, thoughts on targeting this for SC?
 - 1.3.9 release with CentOS 7.7
 - 2.0 if possible for Leap 15.x
