ABOUT ME

I have gained experience in various fields of software and have been actively working with web technologies for the past 6 years. For the last 4 years, I have participated in many freelance projects using React and its derivatives (React Native, Next.js).

EXPERIENCE

Mobile Application Development (React Native)

Airpreneurs 2024 Jun 2024 - Still

- With the support of Turkish Entrepreneurship Foundation and many companies, Tulpar team is developing a mobile application on Digital Transformation in Aviation and Journey Experience.

Tutor

Algorithmics Oct 2023 - Still

- I give Python and Scratch lessons to trainees aged 7-17.

Web Development

Freelance Jun 2019 - Still

- I provide web and mobile development services on the Bionluk platform.

Software Development

Bimser Çözüm Intern Oct 2020 - Jun 2021

- I completed the Software Testing Specialist training and performed mobile, web, and API tests using tools like Postman.
- I developed a Contact Directory application using Python with the SQLite database.
- I created a Phone Directory application using Java that accesses the phone database.
- I cloned the web-based Agar.io game using Socket.IO.

PROJECTS

Dental Polyclinic Website React, Redux, Mail Service (PHP)

[ozdentoz.com](#)

Antares News Website WordPress
